HELLA ACADEMY #HMEABA

Brakes & ABS

Brakes & ABS

Conducted by: **Aydin Almassian**

Practical information:

Duration: **2 days**

Off-site: **Showroom No. S3B2SR05**

1490 AED

Maximum **6 participants**

Fill out the form, and our team will be in touch shortly!

Course description

Build a strong understanding of hydraulic braking systems and anti-lock braking systems (ABS). This practical course explores key components, ABS operation, and the role of sensors and control units in managing braking performance and vehicle stability. Through hands-on workshop exercises, you'll learn to diagnose braking and ABS faults, carry out service and maintenance, and apply a structured diagnostic approach with confidence.

Target group

Automotive mechanic, automotive electrician, automotive mechatronics technician, automotive master mechanic

Learning goals

- Understand braking system & ABS fundamentals
- Identify key components and system functions
- Interpret ABS operation and control logic
- Diagnose braking and ABS faults
- Apply a structured diagnostic approach

Course content

- Braking system basics
- Hydraulic components
- ABS system operation
- Sensors & control units
- Brake force & stability control
- Diagnostics & fault analysis
- Service & maintenance
- Practical workshop exercises

What's included

1490 AED plus VAT, includes:lunch, participant documents,coffee, certificate

Your trainer

Aydin Almassian

Aydin Almassian has over 20 years of experience in the automotive industry, with a specialization in the aftermarket and diagnostics. Since 2019, he has played a key role in the development and expansion of Hella's Electric/Electronic products. Currently, as Product specialist and Technical Manager at Hella Middle East FZE, Aydin Almassian oversees these products while continuously driving innovation and technical excellence in the region.In addition, Aydin Almassian played a pivotal role in the launch, development, and ongoing management of the Hella Gutmann Academy at Hella Middle East. Under his direction, the academy provides specialized training in diagnostics, ADAS (Advanced Driver Assistance Systems) and calibration, helping to advance the skills and knowledge of automotive professionals.Within 5 years at Hella Middle East, Aydin Almassian remains committed to strengthening the company's leadership in both product development and technical expertise, ensuring that Hella continues to be a key player in the evolving automotive industry.

Take Control of Safety & Performance
