

**PRACTICAL TEST**  
**LED: SIMPLY MORE LIGHT**

**The present:**

4 x halogen worklights

**The future:**

4 x LED worklights

**2.00 p.m.: Installation**

Dietmar Bengsch (Technical Sales at HELLA) installing an LED worklight

**5 p.m.: Excitement mounts**

Combine harvesters are being made ready for operation and driven on to the field

**9 p.m.: Practical test on the field**

Direct comparison: A combine harvester with halogen light, a combine harvester with an LED worklight

# WHEN NIGHT BECOMES A WORK DAY

## Practical test at an agricultural contractor

HELLA in a practical test at the agricultural contractor, Albert Feldmann from Münster. Two of his combine harvesters lined up against each other at night in a direct comparison: one with halogen standard equipment and the other with HELLA LED worklights. The LED worklight Power Beam 1500 was installed by Dietmar Bengsch (Technical Sales at HELLA). Up to now, the agricultural contractor, Mr. Feldmann, found his halogen worklight to be optimal.

### 9 p.m.: The practical test began.

Halogen took the first turn. Then the positions were changed and the LED worklight was switched on. The enthusiasm about the light effect from the LEDs was written all over Albert Feldman's face. Dietmar

Bengsch explained the advantages of HELLA's LED worklights: HELLA's LEDs have a service life that is 130 times higher than that of halogen lights. That saves costs which can otherwise arise from repairs and downtimes with halogen headlights. As you can see considerably more around the combine harvester that also increases safety significantly. HELLA thanks Albert Feldmann for his cooperation.

**"With LED even night work is fun. You are safe and more relaxed when driving."**

Albert Feldmann,  
Agricultural contractor from Münster

## The all-round performer: Power Beam 1500 LED
