GUTMANN IS GREEN. AND NOW IT'S ALSO HELLA.

medienformer.de

The Joint Venture >>>

INNOVATION begins with a **VISION.**

AND WHY?

Good question. Why have Hella and Gutmann Messtechnik started a joint venture and launched a workshops solutions company? Simple question. Simple answer: to help everyone. Obviously the companies themselves, everybody working at the companies, and all of our partners. But, more than anyone else: you, the customer.

The vehicle of the future will be all about electronics. This means the success of today's workshops depends on finding the perfect combination of user friendly diagnostic technology, access to detailed vehicle data as well as fast and reliable support for all their diagnostic problems during repairs and the required replacement part. So by founding Hella Gutmann Solutions*, all of this will be possible, from one and the same company. Just for you.

WHAT HAS HELLA GUTMANN SOLUTIONS GOT TO OFFER?

By bringing together the market expertise and professionalism of two leading companies like Hella and Gutmann Messtechnik, we have the combined ability to foster new innovations,

safeguard jobs and, most importantly, provide you with everything you need to keep things running smoothly in the workshop. Of course, with 25,000 employees in 100 countries, Hella can no longer be considered a small company. But both companies have an excellent track record of being established, family-owned businesses and can offer small and medium-sized business the support they require.

For their part, the people working at Gutmann Messtechnik look back on decades of diagnostics experience. And the company boasts a broad and detailed portfolio of products and services, ideally suited to the vehicle repairs industry, based on partnership and cooperation. While Hella adds the skills and experience of more than 3,000 engineering specialists, a huge pool of technical data and a global network of sales and service partners with strong personal relationships with our workshop customers.

But of course a joint venture is always more than the sum of its parts, or in this case: the people working at Hella Gutmann Solutions and our portfolio of services.

Hella Gutmann Solutions is the dependable partner for the workshop of tomorrow.

SO WHAT'S NEW?

The first tangible results of the Hella Gutmann Solutions joint venture comes in the shape of the mega macs 42, a new multi-brand tester. Fast, light and sturdy, the mega macs 42 combines a handy diagnostics device with Gutmann's prize-winning diagnostics technology. At the same time, it's compatible with Hella's DDS 100 data package **, multiplying the number of options for you in the workshop at a highly competitive price. Why? Well, not only does the mega macs 42 offer all key diagnostic functions, working with it is child's play. On top of this, it is economical to use so it's perfect as a starter system or as a second diagnostic tool. Why turn away customers when you can have the mega macs 42.

With Hella Gutmann Solutions, workshops now have access to a comprehensive network of diagnostic information and vehicle data, as well as access to replacement parts and information on all types of parts. You'll find no other system like it, anywhere else in the world. Why not find out more about Hella Gutmann Solutions today? We would be delighted to answer your questions and hear more about your thoughts and needs. Because the future starts today.
