

Universal Voltage Tester

Description	Universal voltage tester featuring 2 probes and dual indicator diodes for general purpose electrical testing. Designed to test for presence of AC voltage in live circuits and +/- polarity of DC voltages. Compact design and ultra fast response time for quick and easy testing.
Voltage Range	6-30V DC 125 - 380V AC/DC
Current Inputs	1 - 1.5mA
Response Time	3 ms
Note	<i>The instrument does not indicate whether shock-hazard voltage is present.</i>

Description	Part No.
Universal Voltage Tester	HM7015
