NOW IN APP FORM.

THE FIRST HELLA APP

Our first app is already a true professional: Through its well designed menu navigation, precise functionality and a wealth of information, the new HELLA app provides real added value. Ideal for both daily and occasional use.

Discover the wide range of HELLA horns and fanfares with access to sound samples and all the information you need at your fingertips – available in 10 languages and developed to HELLA's customary high standard.

Home

Precise from the outset:

The app provides the perfect entry point for your particular need. Simply select commercial vehicles, passenger vehicles, agricultural and construction machinery or two-wheelers and find the right products immediately.

The key facts at a glance: For each horn and fanfare, we have combined the key product characteristics, a product image and the sound on one screen.

- 1 Use the magnifying glass icon to increase the size of the text about each individual product.
- 2 Get all the technical details you need at a glance: The icon bar provides a clear overview of all the technical details you need.
- 3 Get a clear idea of how the selected product sounds by listening to the high tone, deep tone or both together: Simply place your finger on the speaker icon.
- 4 Make the tones even more authentic with a background of authentic traffic sounds. On or off – the decision is at your fingertips.
- 5 Use standard iPhone gestures to scroll through the products in each category – simply swipe with your finger to view the next page.
