PREFACE

EXPECT THE BEST:

EXPECT HELLA BULBS.

As the technological leader for intelligent light distribution systems, halogen, Xenon and full-LED headlamps, and as a partner to renowned international vehicle manufacturers, Hella always meets the highest expectations and quality standards.

We have also applied this benchmark to our bulbs range: premium technology in uncompromising quality that has undergone rigorous testing. This means optimum visibility thanks to premium light quality and minimum failure rates thanks to durable and long-lasting products.

The product range covers a wide range of applications for all kinds of vehicles: passenger cars, trucks, special vehicles and motorbikes – headlamps and other lamps, interior lights, conventional halogen lights and xenon lights. and all with an excellent price-performance ratio.

TESTED QUALITY

All HELLA bulbs undergo rigorous testing. The engineers in Hella's Quality Assurance department have specified a clear requirement profile for every bulb type.

Headlamp bulbs, for example, are stringently tested by our engineers for their light distribution properties. The very latest in light measuring equipment is used for this.

Paint adhesion tests compliant with FAKRA guidelines (German Association of Automotive Experts), vibration and shock tests in line with IEC requirements, geometric measurements, light flux and efficacy measurements, plus lifetime tests guarantee that wholesalers and garages receive perfect quality.

Quality assurance is very important to us

Ensuring you and your customers are satisfied. This is why HELLA's quality assurance engineers carry out exhaustive testing of all our bulbs to ensure their high quality.

And it is thanks to these extensive tests and our OE lighting expertise that you can rely on our guaranteed quality standard.

The results of consistent quality testing

Renowned vehicle manufacturers have been relying on our technological innovations and trusting HELLA's expertise, experience and quality for years.

Geometrical measurement

A measuring projector is used to check the filament geometry for compliance with the statutory standards stipulated in IEC 60810. The filament must be dimensioned and positioned within the bulb as specified in the standard. This is the only way to achieve optimum headlamp power and prevent glare to oncoming traffic.

Vibration and shock test

Here, vibration resistance of the bulbs and the filament in particular is tested on an electro-dynamic vibration table.

Paint adhesion test

The adhesion of paint on coloured glass bulbs—such as the PY21W—is tested in a climate chamber at different temperatures and air humidity levels. Optimum adhesion of glass bulb paint guarantees the prescribed amber indicator light over the whole lifetime.

Lifetime test

Sophisticated tests are used to demonstrate the high reliability of HELLA bulbs over long periods.

Luminous flux measurement

An Ulbricht sphere and goniometer are used to determine the luminous flux and luminous intensity of HELLA bulbs. This guarantees the optimum luminous efficiency of our bulbs.

These tests and measurements form the basis of our tested quality.

LIGHT SOURCES

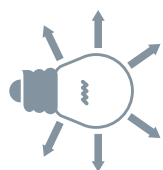

Good visibility is the most important criterion for road safety. Various circumstances can impair this visibility, including twilight, adverse weather conditions, dirty windshields, etc. The risk of accidents is comparatively high under these kinds of driving conditions.

Changing and continually increasing mobility and traffic density also contribute to a higher risk.

To meet these challenges successfully, we are constantly working towards improving existing lighting systems as well as developing new technical lighting equipment.

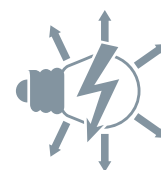

Here is a summary of the most important basic terms in lighting technology and the respective units of measure for lamp and light evaluation.

Luminous flux Φ

Unit: lumen [lm]

Luminous flux Φ is the term used to describe the complete luminous efficacy radiated from a light source.

Luminous efficiency η

Unit: lumen per watt [lm/W]

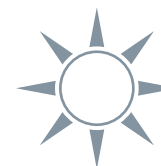

Luminous efficiency η specifies how efficiently consumed electrical power is converted into light.

Luminous intensity I

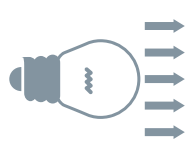

Unit: candela [cd]

This is the portion of the luminous flux radiating in a specific direction.

Light sources

Light sources are thermal radiators that produce light through heat energy. This means the more a light source is heated, the higher its luminous intensity will be.

Illuminance E

Unit: lux [lx]

Illuminance E specifies the incident luminous flux per unit of illuminated area. Illuminance is 1 lx when a luminous flux of 1 lm strikes an area of 1 m².

Luminance L

Unit: candela per square metre [cd/m²]

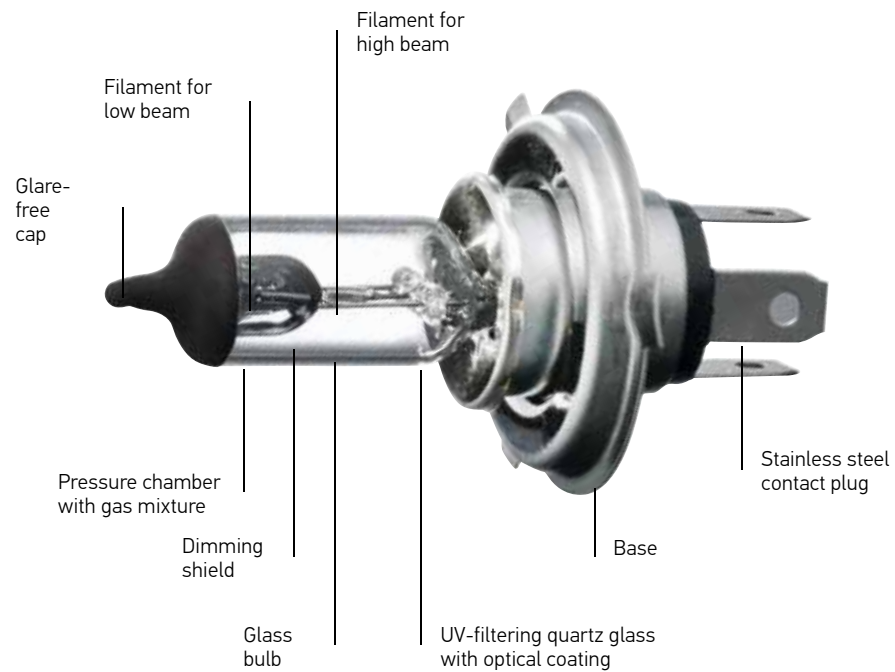

Luminance L is the amount of brightness detected by the eye from a luminous or illuminated surface.

COMPARISON OF LIGHT SOURCES

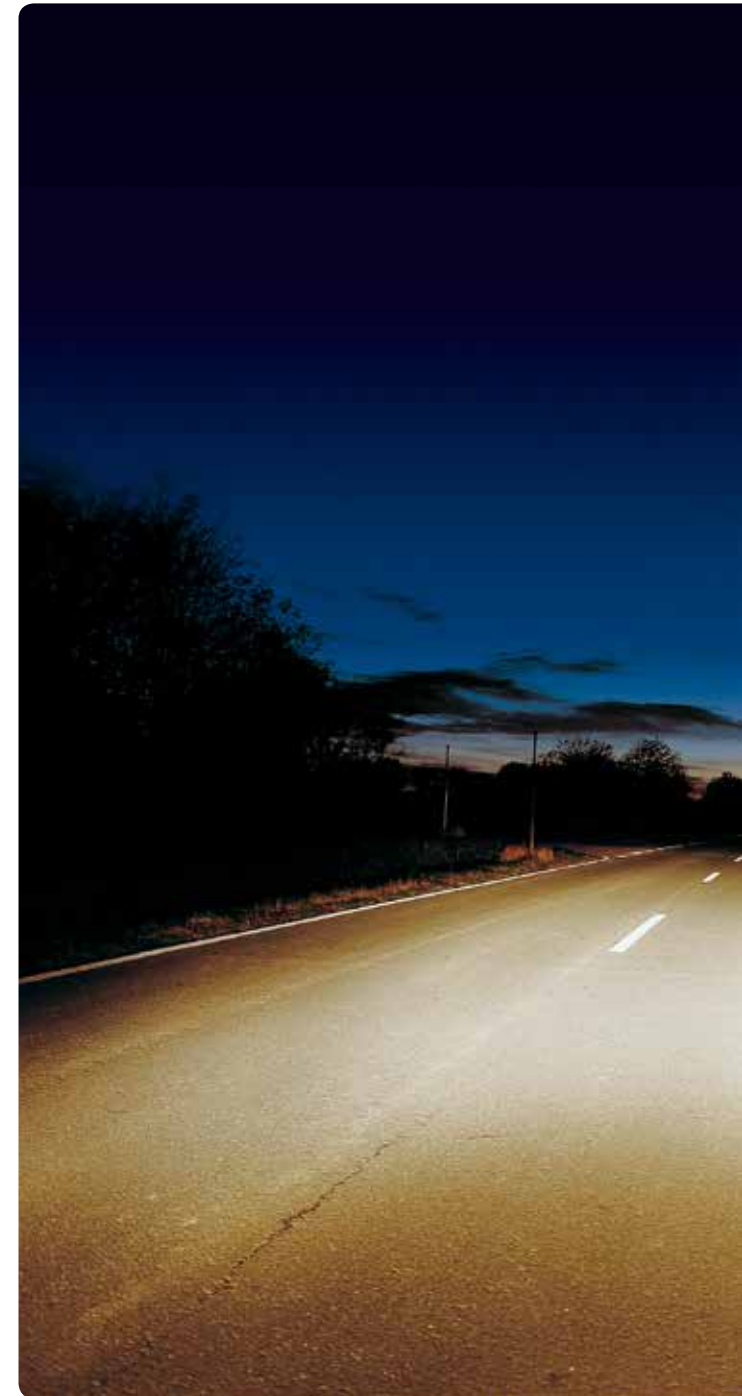

H4 HALOGEN LAMP

Halogen lamps are actually thermal radiators that convert heat energy into light. The filament begins to glow when subjected to a voltage, generating light as a result.

A standard halogen lamp has an efficiency of around 8%. Approximately 92% of the energy is lost as heat radiation.

Typical light distribution and colour temperature of a headlamp with standard halogen lamps.

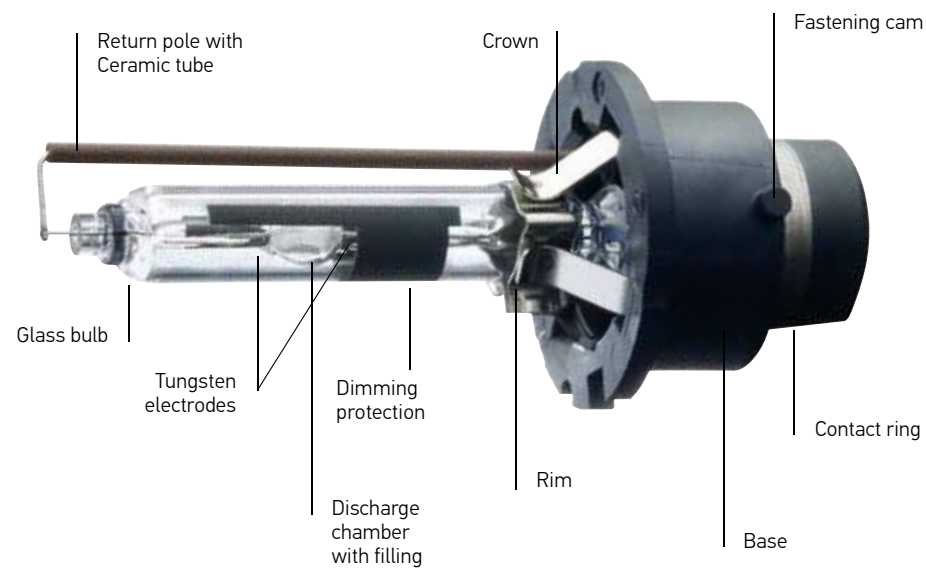

D2R GAS DISCHARGE LAMP

High-intensity gas discharge lamps are also known colloquially as xenon bulbs because they are filled with xenon gas. A ballast generates a high voltage, which produces an electrical gas discharge in the discharge chamber, creating a very bright arc. A gas discharge lamp has an efficiency around 3.5 times higher than a halogen lamp (28% light radiation).

Due to higher luminous efficiency, gas discharge lamps can produce more light than halogen lamps while using the same amount of energy. Thus, an gas discharge lamp of the same size has stronger light distribution.

Typical light distribution and colour temperature of a headlamp with gas discharge lamps.

PORTFOLIO: INCLUDES THE RIGHT LIGHTING PRODUCTS FOR ALL YOUR NEEDS

FIND THE LAMP THAT SUITS YOU

STANDARD: Cost-effective lamps for all standard requirements, with excellent light output, reliability and durability, plus an outstanding price-performance ratio.

LIFETIME: These specially constructed **ONGLIFE** and **DOUBLEPOWER** lamps are ideal for frequent drivers and offer maximum reliability coupled with an increased lifetime*. The **SUPER LONG LIFE** lamps are new to the portfolio and achieve a lifetime up to 3x longer*.

DESIGN: With its cool xenon effect, **BLUELIGHT** is the right alternative for drivers who value good design. The whitish-blue light ensures better illumination of the roadway, more driving comfort and safety.

PERFORMANCE: These **PERFORMANCE +30** and **+50** bulbs are economical entry-level bulbs in our Performance category. They throw more light* onto the roadway and give performance-oriented drivers better visibility.

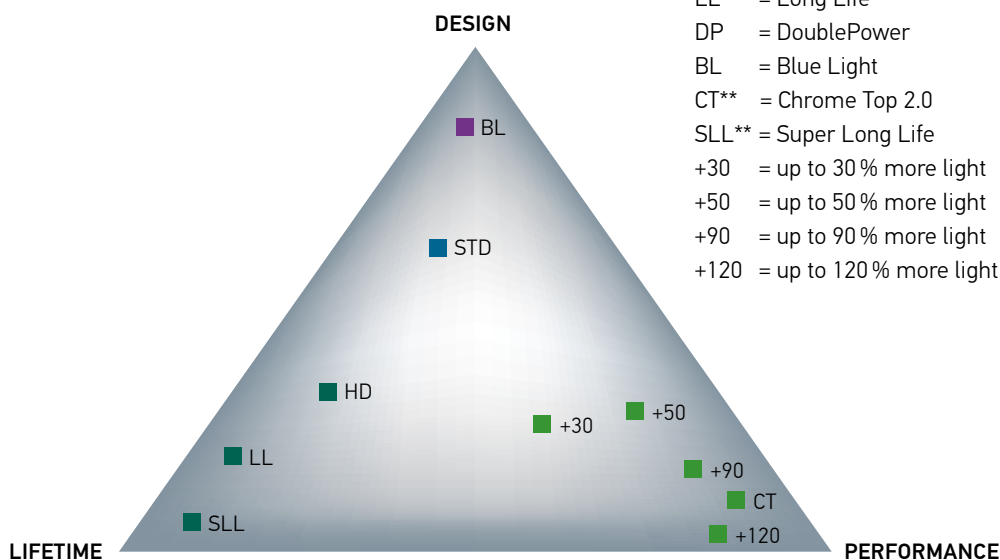

With up to 120% more light* and a 50 m longer light beam* the **+120** lamps set up a new benchmark for halogen lighting, with a whiter light pattern* that makes driving both more enjoyable and safer.

The new **CHROME TOP 2.0**** glistens with a reflecting chrome cap, supplies a whiter light pattern* and offers up to 100% more visibility* on the street.

ALL HELLA BULBS ARE E-TESTED AND CERTIFIED TO ECE R37

Higher wattage halogen lamps are currently not approved for use. HELLA Performance halogen lamps offer maximum luminous efficacy with ECE approval.

WHERE DO YOUR PREFERENCES LIE?

* Compared to standard halogen lamps

** New in our portfolio

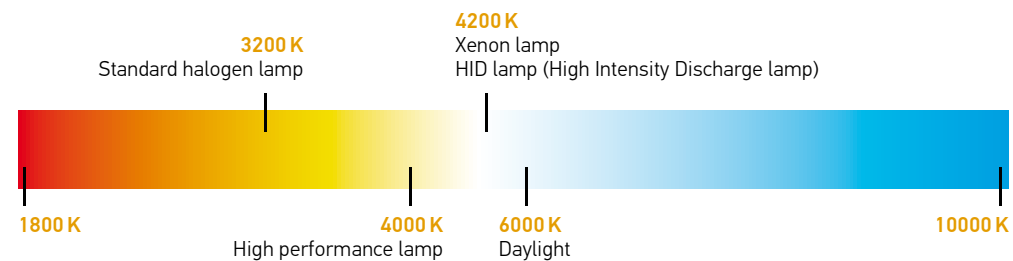

COLOUR SPECTRUM SHOWING TYPICAL COLOUR TEMPERATURES

The colour temperature of light sources is measured in kelvin (symbol K). Colour temperatures over 4,000 K are called 'cold' colours (bluish white), while lower temperatures (yellowish to reddish) are considered 'warm'. The higher the colour temperature of a light source, the higher the proportion of blue in

its colour spectrum (see image below). An incandescent bulb has a warm white colour temperature of approx. 2700 K. The following image depicts the colour temperature spectrum.

SAFETY INSTRUCTIONS

LAMP REPLACEMENT AND INSTALLATION

When inserting a new lamp, you should not touch the glass bulb, because fingerprints may burn in, leaving "clouds" on the glass.

Standard bulbs and halogen lamps do not contain environmentally damaging substances and can be disposed of as household waste

Check your local regulations to ensure correct disposal

HELLA recommends replacing both lamps when one has blown

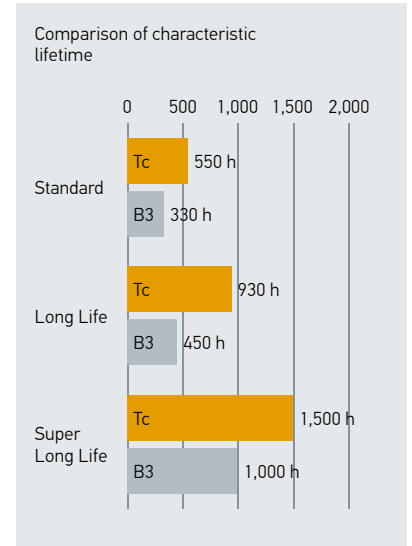

LAUNCH

CHROME TOP 2.0

The new Chrome Top 2.0 combines design and efficiency. The stylishly glistening chrome cap provides an elegant look in clear glass headlamps. With increased brightness* and a light beam up to 60 m longer*, the bulb provides you with up to 100% better visibility on the road. The whiter light is achieved with a special coating process.

SUPER LONG LIFE

The ideal lamp for road users: the new Super Long Life from HELLA. Maximum lifetime* with an operating time up to 3x longer enables an optimum price-performance ratio, as the lamps do not need to be replaced as often.

B3

Time (in hours) after which at least 97% of tested lamps are still functioning.

Tc

Time (in hours) after which at least 36.8% of tested lamps are still functioning. The Tc is also known as the Weibull value and is a common unit for specifying and comparing the lifetime of bulbs.

* Compared to standard halogen lamps

INDIVIDUALITY YOU CAN SEE

STANDARD

HELLA Standard halogen lamps provide original equipment manufacturer quality and great value for your money.

BLUE LIGHT

The cool xenon effect makes the Blue Light an alternative for design-oriented drivers. In addition, the bluish white light helps improve concentration, providing you with increased driving comfort.

The opaque, silver cap offers an elegant look in clear-glass headlamps.

Available in the following versions: H1, H3, H4, H7, H8, H9, H11, W5W

PERFORMANCE + 120

With up to 120% more light* and a light beam* up to 50 m longer, +120 lamps are setting new benchmarks for halogen lighting and are making driving both safer and more enjoyable.

The opaque, silver cap offers an elegant look in clear-glass headlamps.

Available in the following versions: H1, H4, H7

CHROME TOP 2.0

Performance meets design. With up to twice as much usable light* on road and a light beam up to 50 m longer*, the Chrome Top 2.0 is appealing in both style and security.

The shiny chrome cap offers a particularly elegant look in clear-glass headlamps.

Available in the following versions: H4, H7

* Compared to standard halogen lamps

STANDARD: FOR GREATER COST-EFFECTIVENESS

Standard HELLA bulbs provide original equipment manufacturer quality and are a very good value for your money. They feature excellent luminous efficacy, reliability and durability.

- Comprehensive range of products for all standard requirements
- Strong light output
- Long lifetime
- Excellent price-performance ratio

LIFETIME: FOR A LONGER LIFETIME

HELLA Long Life halogen lamps (12 V) have a longer lifetime and are more environmentally friendly*, because they do not have to be replaced as often.

HELLA Super Long Life halogen lamps (12 V), with an operating time* up to 3x longer, provide optimum value for money and the best selection for frequent travellers.

Lifetime stands for

- Environmental friendliness through long usability
- Strong light output
- Longer lifetime
- Optimum price-performance ratio
- Less frequent bulb replacement

PERFORMANCE: FOR MORE LIGHT

Thanks to our innovative technology, HELLA's Performance lamps light up the roadway more than conventional bulbs. The Performance +30 is the economical entry-level bulb in our Performance category, offering up to 30% more light plus a longer lifetime.

The Performance +50 produces 50% more light* with a light beam around 20% longer, providing performance-oriented drivers with additional safety.

At the top of HELLA's halogen Performance range are +90 and +120 lamps, which feature an optimised filament, a special coating process and a 100% noble gas filling that work together to create the best possible performance for halogen bulbs.

DESIGN: FOR INCREASED DEMANDS

Our Design lamps meet special demands relating to design and safety. The cool xenon effect makes the Blue Light the right alternative for design-oriented drivers. A special coating process enables HELLA's Blue Light lamps to achieve a colour temperature of around 4,000 K, similar to an xenon lamp, with up to 20% more brightness*. The whitish-blue light ensures better illumination of the roadway, more driving comfort and safety.

For signal lighting, HELLA also offers a real highlight: HELLA's Magic Start indicator lamps were specially developed for clear-glass headlamps. Thanks to their 'effect paint' coating, they fit perfectly with the silver-coloured reflector and show a yellow light only when flashing. They also have twice the lifetime of conventional indicator lamps.

XENON: FOR MORE POWER

For more than a hundred years, HELLA has been a technological leader for drivers who want to be sure they can see and be seen.

Modern xenon technology is a proven milestone for both driving safety and comfort. With a colour temperature of 4300 K, twice the brightness of halogen lamps and with around three times their luminous efficiency, the white light of these new generation xenon lamps ensures safety and relaxed driving.

The newly developed HELLA Xenon +30 lamps have a colour temperature of up to 5,000 K, which is almost as much as modern vehicles' extremely white LED daytime running lights, offering maximum illumination and visibility similar to daylight.

Advantages of gas discharge lamps

- Bright and broad light distribution
- Long lifetime
- Low power consumption
- High colour temperature for whiter light
- Homogenous light distribution (no shadows)
- Vibration-resistant

ASSORTMENT BOXES

READY FOR ANYTHING

Vehicle lamps fail most often when they are switched on, at night or while on the road. Just when it is most difficult to get hold of a replacement. To help you be prepared for such situations, HELLA offers a number of different assortment boxes with individual packages.

In any situation, the most fundamental requirement for safe driving is good visibility. Therefore, HELLA's assortment boxes contain not only common headlamps, but also signal, indicator and marking lamps, plus a selection of fuses.

H4 assortment box 24 V	8GJ 002 525-941	1	24 V	Box contains one set of H4 headlamps, two common signal lamps for each and six fuses

THE FREEDOM TO DO WHAT MUST BE DONE

Successful agriculture does not happen overnight. But a successful harvest sometimes does. The effective light solutions from HELLA help with this.

In addition to standard lighting, HELLA, as a strong partner in the lighting industry, offers a comprehensive range of products in high-quality worklights for various technologies.

In the agricultural industry as well, HELLA is always providing suitable light sources in original equipment manufacturer quality. A perfectly matched product range for all HELLA halogen and xenon work lamps, but also for areas of standard applications such as headlamps, direction indicators, engine compartment lamps and much more.
