## PREFACE

### SAFETY ON BOARD – LIGHT BULBS FROM HELLA

As the technological leader in smart light distribution systems, halogen, xenon and full LED headlamps, and as a partner to renowned vehicle manufacturers throughout the world, HELLA always meet the highest expectations and quality standards.

These are the specific standards we apply to our extensive range of light bulbs: Product diversity—from traditional halogen lights all the way to stylistic (design-oriented) xenon lights, leading technology with rigorously tested high-quality without any compromises and optimum light output levels, even in the harshest weather conditions.

This ensures that our long-lasting, robust products not only have the lowest possible failure rates, but are also significantly brighter. For your safety on the road.

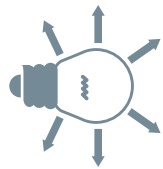

# LIGHT SOURCES

Good visibility is the most important criterion for road safety. Various circumstances can impair this visibility, including twilight, adverse weather conditions, dirty windshields, etc. The risk of accidents is comparatively high under these kinds of driving conditions.

Changing and continually increasing mobility and traffic density also contribute to a higher risk. To meet these challenges successfully, we are constantly working towards improving existing lighting systems as well as developing new technical lighting equipment.

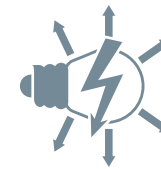

Here is a summary of the most important basic terms in lighting technology and the respective units of measure for bulb and light evaluation.

#### Luminous flux $\Phi$

Unit: lumen [lm]

Luminous flux  $F$  is the term used to describe the complete luminous efficacy radiated from a light source.

#### Luminous efficacy $\eta$

Unit: lumen per watt [lm/W]

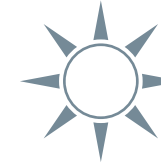

Luminous efficacy  $\eta$  specifies how efficiently consumed electrical power is converted into light.

#### Luminous intensity $I$

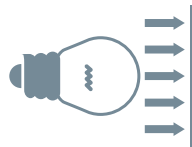

Unit: candela [cd]

This is the portion of the luminous flux radiating in a specific direction.

#### Light sources

Light sources are thermal radiators that produce light through heat energy. This means the more a light source is heated, the higher its luminous intensity will be.

#### Illuminance $E$

Unit: lux [lx]

Illuminance  $E$  specifies the incident luminous flux per unit of illuminated area. Illuminance is 1 lx when a luminous flux of 1 lm strikes an area of 1 m<sup>2</sup>.

#### Luminance $L$

Unit: candela per square meter [cd/m<sup>2</sup>]

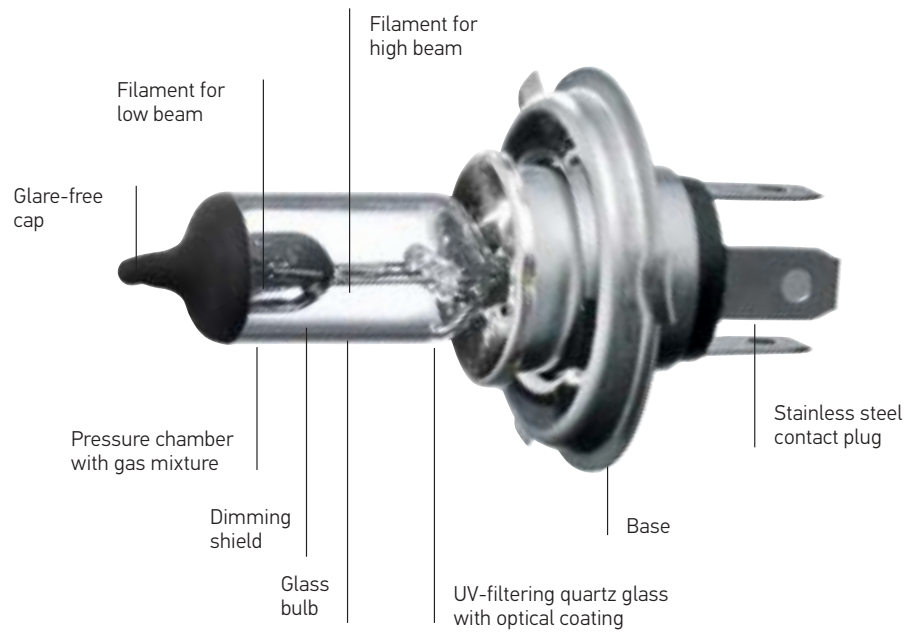

Luminance  $L$  is the amount of brightness detected by the eye from a luminous or illuminated surface.

# COMPARISON OF LIGHT SOURCES

## H4 HALOGEN LAMP

Halogen lamps are actually thermal radiators that convert heat energy into light. The filament begins to glow when subjected to a voltage, generating light as a result.

A standard halogen lamp has an efficiency of around 8%. Approximately 92% of the energy is lost as heat radiation.

Typical light distribution and color temperature of a headlamp with standard halogen lamps.

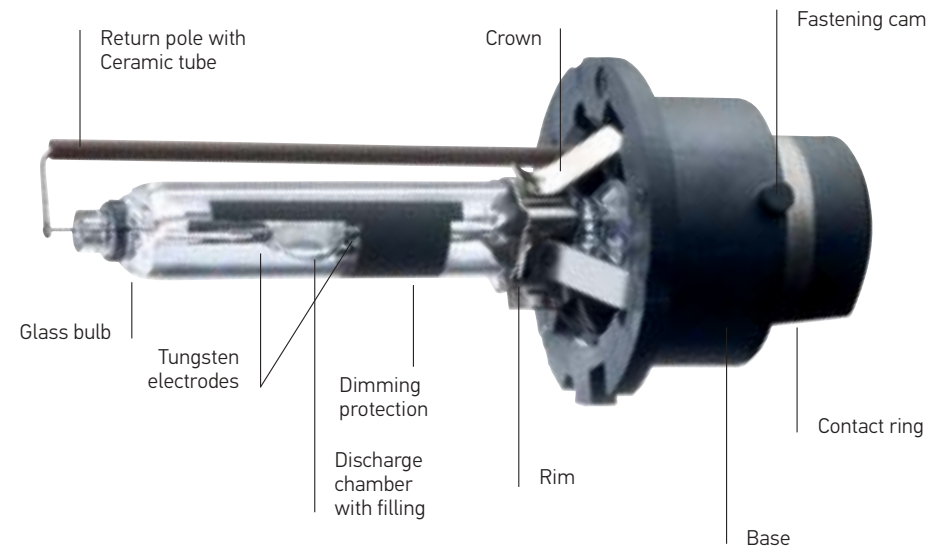

## D2R HID LAMP

High-intensity discharge (HID) lamps are also known colloquially as xenon bulbs because they are filled with xenon gas. A ballast generates a high voltage, which produces an electrical gas discharge in the discharge chamber, creating a very bright arc. An HID lamp has an efficiency around 3.5 times higher than a halogen lamp (28% light radiation).

Due to higher luminous efficacy, HID lamps can produce more light than halogen lamps while using the same amount of energy. Thus, an HID lamp of the same size has stronger light distribution.

Typical light distribution and color temperature of a headlamp with HID lamps.

# THE RIGHT SOLUTION, EVERY TIME

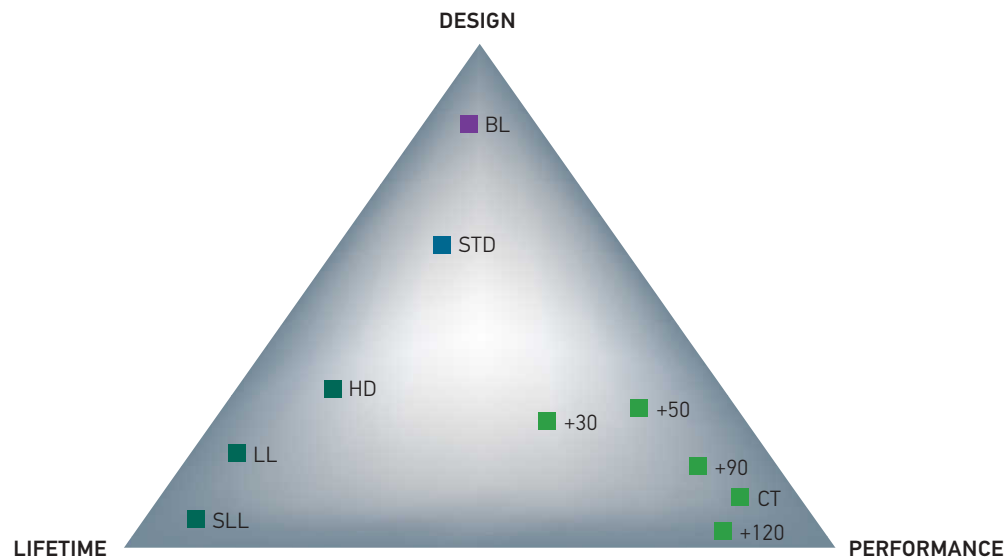

## PERFORMANCE PYRAMID FOR HELLA HALOGEN LAMPS

Drivers are as varied as their cars and their requirements are just as varied. There are many ways to modify a halogen bulb to match the characteristics to individual needs. The HELLA range of halogen lamps pushes the envelope of the possible and offers the right lamp for every driver.

## ALL HELLA BULBS ARE E-TESTED AND CERTIFIED TO ECE R37

Higher wattage halogen lamps are currently not approved for use. HELLA Performance halogen lamps offer maximum luminous efficacy with ECE approval.

## WHERE DO YOUR PREFERENCES LIE?

- STD = Standard
- HD = Heavy Duty
- LL = Long Life
- BL = Blue Light
- CT = Chrome Top 2.0
- SLL\* = Super Long Life
- +30 = Up to 30% more light
- +50 = Up to 50% more light
- +90 = Up to 90% more light
- +120 = Up to 120% more light

\*New in our portfolio

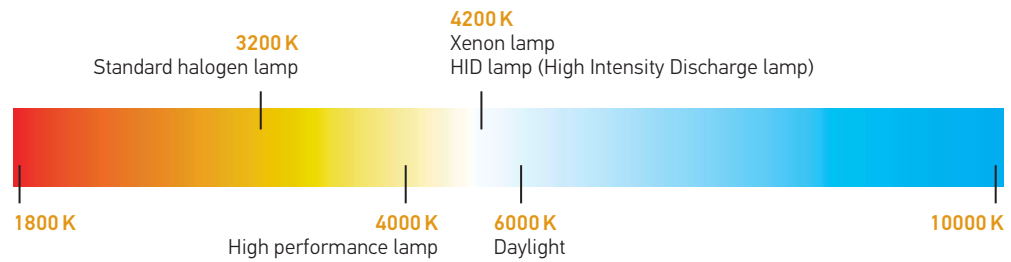

### COLOR SPECTRUM SHOWING TYPICAL COLOR TEMPERATURES

The color temperature of light sources is measured in kelvin (symbol K). Color temperatures over 4,000 K are called 'cold' colors (bluish white), while lower temperatures (yellowish to reddish) are considered 'warm'.

The higher the color temperature of a light source, the higher the proportion of blue in its color spectrum (see image below). An incandescent bulb has a warm white color temperature of approx. 2,700 K. The following image depicts the color temperature spectrum.

# SAFETY INSTRUCTIONS

## LAMP REPLACEMENT AND INSTALLATION

When inserting a new lamp, you should not touch the glass bulb, because fingerprints may burn in, leaving "clouds" on the glass.

Standard bulbs and halogen lamps do not contain environmentally damaging substances and can be disposed of as household waste

Check your local regulations to ensure correct disposal

HELLA recommends replacing both lamps when one has blown

# LAUNCH

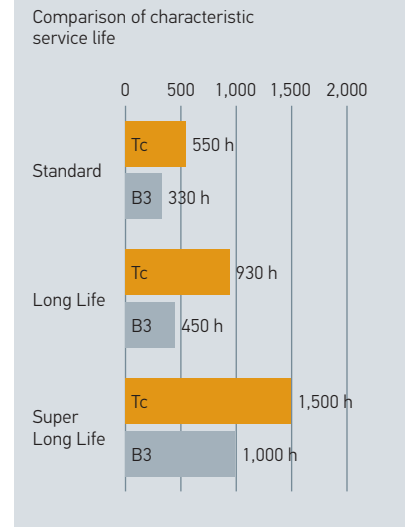

## CHROME TOP 2.0

The new Chrome Top 2.0 combines stunning optics with efficiency: The shiny, stylish silver cap provides an elegant look in the clear glass headlamps. With increased brightness\* and a light beam up to 60 m longer\*, the bulb provides you with up to 100% better visibility on the road. The whiter light is achieved with a special coating process.

\* Compared to standard halogen lamps

## SUPER LONG LIFE

The ideal lamp for travelers: the new Super Long Life from HELLA. Maximum design life with an operating time up to 3x longer enables an optimum price-performance ratio, so the lamps do not need to be replaced as often.

### B3

Time (in hours) after which at least 97% of tested lamps are still functioning.

### Tc

Time (in hours) after which at least 36.8% of tested lamps are still functioning. The Tc is also known as the Weibull value and is a common unit for specifying and comparing the service life of bulbs.

# INDIVIDUALITY YOU CAN SEE

## STANDARD

HELLA Standard halogen lamps provide original equipment manufacturer quality and a great value for your money.

## BLUE LIGHT

The cool xenon effect makes the Blue Light an alternative for design-oriented drivers. In addition, the bluish white light helps improve concentration, providing you with increased driving comfort.

The opaque, silver cap offers an elegant look in clear-glass headlamps.

Available in the following versions: H1, H3, H4, H7, H8, H9, H11, W5W

## PERFORMANCE + 120

With up to 120% more light\* and a light beam\* up to 50 m longer, +120 lamps are setting new benchmarks for halogen lighting and are making driving both safer and more enjoyable.

The opaque, silver cap offers an elegant look in clear-glass headlamps.

Available in the following versions: H1, H4, H7

## CHROME TOP 2.0

Performance meets design. With twice as much usable light\* on the road and a light beam up to 50 m longer\*, the Chrome Top 2.0 features outstanding style and safety.

The shiny silver cap offers a particularly elegant look in clear-glass headlamps.

Available in the following versions: H4, H7

\* Compared to standard halogen lamps

# STANDARD: FOR GREATER COST-EFFECTIVENESS

Standard bulbs for passenger cars provide original equipment manufacturer quality and are a very good value for money. They feature excellent luminous efficacy, reliability and durability.

- Comprehensive range of products for all standard requirements
- Strong luminous efficacy
- Long service life
- Very good value for money

# LIFETIME: FOR A LONGER SERVICE LIFE

HELLA Long Life halogen lamps (12V) have a longer service life and are more environmentally friendly\*, because they do not have to be replaced as often.

HELLA Super Long Life halogen lamps (12V), with an operating time\* up to 3x longer, provide optimum value for money and the best selection for frequent travelers.

## Lifetime stands for

- Environmental friendliness through long usability
- Strong luminous efficacy
- Longer service life
- Optimum price-performance ratio
- Less frequent bulb replacement

# PERFORMANCE: FOR MORE LIGHT

Thanks to our innovative technology, HELLA's Performance lamps light up the roadway more than conventional bulbs. The Performance +30 is the economical entry-level bulb in our Performance category, offering up to 30% more light plus a longer service life.

The Performance +50 produces 50% more light\* with a light beam around 20% longer, providing performance-oriented drivers with additional safety.

At the top of HELLA's halogen Performance range are +90 and +120 lamps, which feature an optimized filament, a special coating process and a 100% noble gas filling that work together to create the best possible performance for halogen bulbs.

# DESIGN: FOR INCREASED DEMANDS

Our Design lamps meet special demands relating to design and safety. The cool xenon effect makes the Blue Light the right alternative for design-oriented drivers. A special coating process enables HELLA's Blue Light lamps to achieve a color temperature of around 4,000 K, similar to a xenon lamp, with up to 20% more brightness\*. The whitish-blue light ensures better illumination of the roadway, more driving comfort and safety.

For signal lighting, HELLA also offers a real highlight: HELLA's Magic Star indicator lamps were specially developed for clear-glass headlamps. Thanks to their 'effect paint' coating, they fit perfectly with the silver-colored reflector and show a yellow light only when flashing. They also have twice the service life of conventional indicator lamps.

# XENON: FOR MORE POWER

For more than a hundred years, HELLA has been a technological leader for drivers who want to be sure they can see and be seen. Modern xenon technology is a proven milestone for both driving safety and comfort. With a color temperature of 4,300 K, twice the brightness of halogen lamps and with around three times their luminous efficacy, the white light of these new generation xenon lamps ensures safety and relaxed driving.

The newly developed HELLA Xenon +30 lamps have a color temperature of up to 5000 K, which is almost as much as modern vehicles' extremely white LED daytime running lights, offering maximum illumination and visibility similar to daylight.

## Advantages of HID lamps

- Bright and broad light distribution
- Long service life
- Low power consumption
- High color temperature for whiter light
- Homogenous light distribution (no shadows)
- Vibration-resistant

# ASSORTMENT BOXES

## READY FOR ANYTHING

Vehicle lamps fail most often when they are switched on— at night and while on the road. Just when it is most difficult to get hold of a replacement. To help you be prepared for these kinds of situations, HELLA offers a number of different assortment boxes with individual packages.

In any situation, the most fundamental requirement for safe driving is good visibility. Therefore, HELLA's assortment boxes contain not only common headlamps, but also signal, indicator and marking lamps, plus a selection of fuses.
