

FORVIA HELLA LABORATORY QUALITY MANAGEMENT POLICY

Laboratory services within FORVIA HELLA are an essential part of high product quality delivery, complying with FORVIA HELLA Quality Policy.

As an impartial laboratory, our commitment is to deliver valid test results and pro-vide expertise on product specifics and testing. We trustfully cooperate with our internal and external customer.

We achieve and maintain a Quality Management System that is in accordance with ISO/IEC 17025, compliant to legal and customer requirements.

Our common goal is to ensure effectiveness and increase the efficiency up to uniform test reports and calibration certificates with correct, reliable, comparable and timeliness results.

The continuous improvement in effectiveness is given through conduct of internal audits, assessments and proficiency tests.

We ensure that all personnel are competent and qualified for their tasks and familiarize themselves with the quality system documentation in order to implement the policies and procedures in their work.

We further develop our Testing Strategies relative to innovate product-, safety-, legal and market requirements and needed traceability.
