

DISC BRAKE ROTORS

<https://hella.mypartfinder.com/>

BRAKE DISC ROTORS OE QUALITY

HELLA is a leading supplier of innovative brake systems in the independent aftermarket. We combine proven OE engineered brake technology with extensive professional sales support, leading innovation with first-class technical service and a complete product range with outstanding logistics. HELLA Brakes is one of the leading Global providers of brake systems in the independent aftermarket. We can look back on decades of experience as an Original Equipment Manufacturer and offer the sales competence of one of the largest trading organizations in the world. Even the most discerning customers are impressed by the breadth and quality of the product ranges we offer.

PRODUCT RANGE

HELLA High Carbon Rotors are designed to deliver motorsports performance and reliability in a wide range of everyday road vehicles. Using OE specifications, HELLA is able to provide exact fit and finish, while providing better material content to give customers more confidence in the stopping power of their vehicles.

- Fully coated for easy installation and no cleaning
- High Carbon Rotors best for thermal handling, noise absorption, and consistent friction
- Less prone to warpage
- Quieter operation versus non high carbon rotors
- OE spec dimensions and cooling fin structure for optimal stopping performance

HELLA Two Piece Rotors feature an aluminium hat and a High Carbon friction ring, which are bonded together by rivets. The use of aluminium delivers a weight savings of 15-20 percent and reduces the unsprung mass of the brake system.

- Made in Europe
- Improvement in driving properties vs one piece rotors
- High Carbon friction ring with aluminum hat
- OE spec dimensions and cooling fin structure for optimal stopping performance
- Fully coated for easy installation and no cleaning

Brake shoes and drums from HELLA are the perfect solution for rear axle applications. Drum brakes offer attractive advantages over disc brakes, especially in the small and compact car class and also in more and more electric and hybrid vehicles. They are cheaper to manufacture, save weight, minimise noise due to their design, and protect the rim from dust and dirt thanks to their closed-in design. Thanks to their self-reinforcement, drum brakes deliver a higher braking effect with less actuation effort. The wear is lower than with brake pads and brake discs, which enables longer maintenance intervals.

Quality at the highest level

Offering products of less than top quality is simply not enough for us. This is why HELLA Brake Systems easily meets all of the performance requirements of the OEMs. When it comes to our brake discs, this affects the:

- Material structure
- Manufacturing method
- Chemical composition
- Production tolerances
- Product design
- Corrosion protection

AHEAD OF THE CURVE

HIGH-CARBON BRAKE DISCS

Reduced braking noise

Optimum silencing properties thanks to a higher proportion of carbon.

Less fading

Optimum braking power even in extreme situations, thanks to the faster heat dissipation properties of the high-strength gray cast iron.

Less lateral runout

The improved thermal conductivity of the high-carbon material reduces deformation. The result: fewer vibrations. Quiet braking.

Reliable protection

The lacquering permanently protects the pan and outer ring against corrosion and is also resistant to rim cleaner.

OE standard

The high-carbon material lives up to OE quality standards.

Enhanced braking comfort

Ideal tolerance values make braking safer and more direct.

Time-saving installation

Thanks to the coating, there is no need to remove any preservative oil. As a result, the brake disc is ready for immediate installation.

Environmentally friendly coating

The coating is made from a special water-based lacquer that is completely harmless to the environment.

QUALITY ASSURANCE PROGRESS THROUGH STRESS TEST

The distinction between first class and mediocre is best expressed by the word “quality”. For HELLA, even the most stringent demands on quality must be fulfilled and clearly defined product characteristics complied with as a matter of course. We deliver tried-and-tested, reliable safety and high performance – and that’s a guarantee of quality we apply to all our products.

By using effective testing methods in our dedicated research and development centers, we can ensure that our products meet regulations set out by vehicle and brake manufacturers as well as standards and requirement specifications. In turn, this guarantees the utmost in safety and comfort.

One example: Neutral salt spray fog testing (to DIN EN ISO 9227). This standardized test procedure sets out to examine and evaluate the corrosion protection effect that certain types of coating or lacquering provide. This is also the case with our coated high-carbon brake discs when compared to non-coated standard brake discs. To do this, an atmosphere that encourages rust formation is created in a special chamber. The brake discs are sprayed with a sodium chloride solution over a period of 72 to 96 hours. Even after just 24 hours, the corrosion protection delivered by our high-carbon brake discs is clear to see: The environmentally friendly lacquering that these high-carbon brake discs feature provides ideal protection against rusting, both in the bowl area and on the contact face. Not only does this ensure a perfect look is maintained, but it also serves as further proof of HELLA’s ability to meet highest quality standards.

Test setup before and during testing

To ensure the best possible friction pairing, HELLA PAGID high-carbon brake discs should always be replaced in pairs with HELLA PAGID brake pads.

THE BRAKES SHINE IN A NEW LIGHT!

Discover the performance of HELLA Brakes

In the ever-evolving world of automotive expertise, it is crucial to find a partner who consistently drives the success of your repair shop. HELLA, a name synonymous with pioneering technology and unrivaled quality in the automotive industry, proudly presents its comprehensive range of braking solutions. With HELLA brakes, we bring the essence of high-quality products, innovative solutions, and the demand for flexibility and reliability directly to the front door of your repair shop.

Premium quality you can trust

HELLA brakes are characterized in the market by uncompromising quality and performance, reflecting the esteemed standards, quality, and articles of the former joint venture. Our commitment to maintaining the highest quality ensures that every component, from brake pads to hydraulics, meets the strict requirements of premium quality specifications. This pursuit of excellence means that repair shops can confidently provide a first-class service, safe in the knowledge that they are fitting parts designed for long life and optimal performance in all driving conditions.

Extensive range for every need

As a full-range supplier of brake components, HELLA recognises the importance of a holistic approach to vehicle maintenance. We cover all items relating to a vehicle's braking system and ensure that garages have access to a complete range of products for all the maintenance work they carry out. From wear parts and brake hydraulics to state-of-the-art brake electronics, our portfolio is carefully tailored to the needs of all vehicles, including in the growing field of e-mobility. Thanks to our fast-to-market approach, everything is ensured in the shortest possible time, which makes us the benchmark for long life and performance in all driving conditions.

Highest level of expertise in brake electronics

The combination of HELLA OE expertise in the field of automotive brake electronics with the high-quality brake wear parts and hydraulics range positions us uniquely in the market. Our advanced braking solutions are not just about parts; they embody a fusion of cutting-edge technology and mechanical excellence.

Leading the way in e-mobility

As the automotive industry shifts towards electric and hybrid vehicles, HELLA is leading the way in providing future-oriented braking solutions with high coverage. Our products are designed to meet the requirements of e-mobility and ensure that repair shops are prepared for servicing the next generation of vehicles. At HELLA, future orientation does not mean waiting for the future; it means being optimally equipped for today's challenges.

Unrivaled availability and flexibility

Understanding the needs of repair shops goes beyond the provision of high-quality parts. HELLA ensures high availability and flexible logistics solutions to keep your operations running smoothly. Our efficient distribution network ensures that the parts you need are always readily available, minimizing downtime and enhancing your service capabilities. At HELLA, flexibility and reliability go hand in hand, offering you the support you need, whenever you need it.

Opt for HELLA Brake Systems: The friend for the success of your Repair Shop

Benefit from the power of first-class quality, a comprehensive range, and state-of-the-art innovation with HELLA brakes. Our pursuit of excellence, coupled with a deep understanding of the automotive landscape, including the emerging field of e-mobility, makes us the ideal friend for garages that want to succeed. Rely on HELLA for flexible and reliable solutions that give you the edge in the fast-paced world of automotive repair.
