

PRODUCT INFORMATION

Accelerator pedal sensors

- Contactless measurement
- Slim yet sturdy design
- Simple mechanical connection
- Redundant output signal
- High measurement precision
- No training in the vehicle necessary
- High interference immunity against electrical and magnetic fields

PRODUCT FEATURES

Application

HELLA accelerator pedals designed for upright or pendant mounting can be used in a wide variety of vehicles – ranging from automotive sector applications, such as sports cars and electric vehicles, to robust applications in agricultural and construction vehicles. Thanks to the contactless system of measurement provided by HELLA's own CIPOS® sensor (see description of construction and function) and its extremely low level of mechanical wear, it is advisable to choose such a sensor system over contact-type accelerator pedals, especially for small, frequently recurring movements.

HELLA ACCELERATOR PEDAL SENSORS
