

BRIEF INFORMATION NEW RELAYS

- HELLA has set the standard for quality by being a primary brand within the automotive industry for decades.
- HELLA offers a diverse range of relays to support both accessory add-ons or original equipment replacements.
- Range has expanded to include both MINI and MICRO “280” relays to support GM and other OEM brands.
- Competitive pricing counters the ever changing cost concerns tied to import tariffs.

THE RIGHT CHOICE

HELLA offers relays for the most basic accessory add-ons like horns and auxiliary lighting. Typical choices include 965400071 basic SPST Mini ISO relay or the 933791121 SPST Mini ISO relay with dual load output pins for easy high / tone or left / right channel connections.

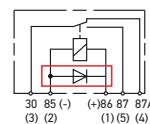

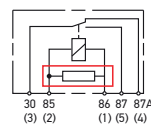

965400071 (New)

933791121 (New)

OE relay replacement requires the right relay. Don't risk damaging the complex electronics of modern cars with any off-the-shelf relay. OE replacement relays often require coil voltage suppression to prevent damage to the sensitive electronics that control the on / off of applications (ie body control modules, etc.). HELLA OE replacement relays are fitted with either resistor or diode suppression protection. Usually in OE relay replacement, replace with like for like footprint and suppression. Some typical OE replacement examples are as follows. Look for the resistor or diode across the coil on the schematic.
