

# PRODUCT INFORMATION

## OIL FILTERS

- Premium Quality: Manufactured to the highest industry standards, HELLA oil filters deliver consistent, high-performance filtration, even in demanding or extreme driving conditions.
- Easy Replacement: With precise fitment and high pulsation resistance, HELLA oil filters designed for quick and hassle-free replacement across a wide range of vehicles.
- Durability: Engineered to withstand high pressure and temperature fluctuations, HELLA oil filters offer long service life and consistently reliable performance.

## PRODUCT FEATURES

HELLA offers a wide range of premium oil filters designed to deliver clean oil, protect the engine, and extend its service life. By efficiently capturing and removing fine particles and contaminants, HELLA oil filters ensure optimal lubrication and contribute to reduced engine wear and minimized repair costs.

### HELLA Oil Filter's additional benefits:

HELLA oil filters offer essential engine protection, performance optimization, and maintenance efficiency – making them a trusted solution for workshops and everyday drivers.

**Efficient Engine Protection:** With high dirt-holding capacity, HELLA oil filters trap harmful particles and residues before they can cause engine damage.

**Clean and Effective Lubrication:** By removing impurities, the filters ensure smooth oil flow, reduce internal friction, and maintain optimum engine performance.

**Reduced Maintenance Costs:** By preventing sludge buildup and component wear, HELLA oil filters help minimize the need for expensive engine repairs.

**Reliable Fit and Function:** Robust construction and OE-matching design ensure perfect installation and dependable operation.

### How does it work?

The oil filter is a vital component of the engine's lubrication system. Its primary function is to clean the engine oil as it circulates through the system.

**Oil Circulation:** As the engine runs, oil circulates through the engine to lubricate moving parts and reduce friction.

**Contaminant Filtration:** The oil filter traps metal particles, combustion residues, and dirt that can accumulate in the oil over time.

**Clean Oil Flow:** Only filtered oil is returned to the engine, ensuring continued effective lubrication and protection of critical components.

**Pressure Regulation:** HELLA oil filters are designed to withstand high pressure, ensuring reliable operation even during cold starts or in high-performance engines.

# OIL FILTERS

## Why and when to replace?

Regular replacement of the oil filter is essential to maintain engine health and efficiency.

**Contamination Buildup:** Over time, filters become saturated with debris and contaminants, reducing their effectiveness and increasing the risk of unfiltered oil circulating through the engine.

**Performance Loss:** A clogged oil filter can restrict oil flow, resulting in reduced lubrication, increased engine wear, and even engine overheating.

**Maintenance Interval:** Oil filters should be replaced during every oil change, in accordance with the vehicle manufacturer's recommended maintenance schedule.

**Engine Protection:** Timely replacement ensures that harmful particles are continuously removed, preserving engine performance and extending its lifespan.

## What does HELLA offer?

**Premium Technical Expertise and Service:** Our technical workshop service, being provided through our experts, is rounding off our technical service. In addition to Tech World, our Partner World offers targeted content for wholesalers, helping them to better serve their customers.

**Target-oriented Marketing Services:** Entire communication to market and supporting the W/D with a powerful communication package.

**Vast Data Management Services:** HELLA's sophisticated data management services allow for precise and efficient parts identification, ensuring that wholesalers and workshops can quickly find the right parts.

**Tailormade Logistic Solutions:** Our logistics are designed to meet the specific needs of our partners, ensuring timely and reliable delivery of products.

---

**Introducing HELLA Automotive Filters:** HELLA now brings a premium range of automotive filters to the independent aftermarket, offering high-quality air, oil, fuel and cabin air filters engineered for optimal protection and performance to keep engines clean and running smoothly. Developed with strong OE-grade expertise and expanding globally by the end of 2025, this comprehensive filter portfolio delivers reliable fit, excellent coverage and trusted filtration technology for passenger vehicles with further expansion planned into commercial vehicle segments.
