

## BRIEF INFORMATION

### HELLA VALUEFIT hand lamps

- Rechargeable hand lamps with micro USB cable
- Compact design for universal applications
- Choose from different light intensities
- Multifunctional use and magnetic attachment

## PRODUCT FEATURES

The new HELLA VALUEFIT hand lamp range offers five handy and rechargeable lamps for workshop, leisure and DIY applications. In addition, a bonnet lamp with a powerful 1,000 lumen light output is available, which can be used in bonnets with a width of 120 to 200 cm using telescopic mounting. These multifunctional lamps can be used quickly and flexibly wherever additional light is required for repair or inspection work.

It is particularly practical that different illumination levels can be selected depending on the intended use. Specially matched to the shape of the lamp, the holders and magnetic attachments offer the right product for every application – especially when you need your hands free to work.

All hand lamps can be recharged using the USB cable included.
