PRODUCT OVERVIEW

MINING

LIGHTING DESIGN SOLUTIONS

A SCIENTIFIC APPROACH TO LIGHTING

At HELLA Australia, we offer a professional lighting design service to create the optimum lighting solution for your requirements, taking the guesswork out of lighting and maximising safety, productivity and profitability.

As a global leader in lighting for mining applications, our lighting design team has comprehensive expertise in this sector and extensive knowledge of the operational requirements and the challenges faced when working in this environment.

They work in close partnership with our customers throughout the process and the customised solutions that they create can be evaluated, influenced and optimised by the stakeholders prior to implementation.

What is a lighting design?

Lighting design is traditionally a field within architecture and interior design that is concerned with the design of lighting systems, including natural light, electric light, or both, to serve human needs.

At HELLA Australia, our lighting design process for mining and quarrying applications uses an engineering-based, application-focused approach that takes into account the following factors for both static and mobile installations:

- The ambient light levels of the site, whether a surface mine or underground mine
- The optimum level and distribution of light required to maximise safety and productivity
- The colour of the light and its effect on the user(s)
- Environmental factors, such as dust, moisture or vibration, that may determine the durability of the work lights required
- Cost of ownership and maintenance requirements

The final proposal is provided in a clear and concise document with graphical simulations showing before and after scenarios.

What are the benefits?

Our lighting design team will only propose solutions that they can be confident will deliver clear and measurable results in terms of:

- Increased safety
- Enhanced operator ergonomics
- Higher productivity
- Reduced downtime

Why choose HELLA?

Whilst HELLA products are used in a wide range of industries globally, mining is a specific area of focus for HELLA and we are committed to delivering quality, innovation and value for our customers in this sector.

Whether work lights, beacons or signal lamps, all HELLA products for mining applications are designed, manufactured and rigorously tested to offer class-leading performance and reliability.

CUSTOMISED LIGHTING DESIGN SOLUTIONS

HELLA Mining lighting designs are tailored to each specific vehicle, taking into account the size of the machine and its configuration. Considering all of these variables results in the optimum lighting solution, ensuring clear and uniform illumination of the work area as well as no-go zones around the vehicle for the safety of site personnel.

Example: Excavator

The lighting scheme utilises RokLUME 380 N close range work lights for optimum illumination of the work areas, and UltraRAY 2.0 rotating beacons and BL470 red LED warning lights for maximum operational safety

IP Rating	IP 6K7, IP 6K9K
Operating Temperature	-40°C to 60°C
EMC Interference Immunity	ECE-R10, CISPR 25 Class 5,
Type Approval	SAE J845 class 1, ECE R65

K-LED® Nano

HELLA's smallest homologated beacon to date, K-LED Nano generates a long-range, amber warning signal by means of a flashing light.

The standard version is characterised by a slightly curved base which, with a bolt circle diameter of 130 mm, stays true to the usual HELLA mounting points.

In addition, a variant with flexible pipe socket mounting is available. The shock-absorbing and vibration-damping base briefly tilts the beacon by up to 45°Δ and cushions even strong impacts. Thanks to this option and to the complete sealing of the beacon, the K-LED Nano can also be used both in vibration-intensive and dusty environments.

Power Consumption	Max. 19 W
IP Rating	IP 6K7, IP 6K9
Operating Temperature	-40°C to 60°C
EMC Interference Immunity	CISPR25 class 5, ECE R10
Connection	150 mm cable with 6.3 x 0.8 – 1.5 flat connector
Type Approval	ECE-R65 TA1, SAE J845 Class 1 approval

K-LED® Reblution

The K-LED® Reblution is a revolutionary beacon featuring the latest LED technology. It provides maximum performance in a minimalist and highly innovative, dome-free design. Instead, the light is visible through a circumferential, ring-shaped light band. Despite light exit area being smaller than a conventional domed beacon the K-LED® Reblution emits a highly visible warning signal.

Power Consumption	Rotating: max. 13 W
IP Rating	IP 6K7, IP 6K9K
Operating Temperature	-40°C to 60°C
EMC Interference Immunity	ECE-R10, Rotating: CISPR 25 Class 3
Type Approval	ECE-R65 TA1 (E1)

RotaLED Compact

Using the latest LED technology, the RotaLED Compact provides a highly visible rotating warning light pattern without the need for moving parts, ensuring greater reliability and a long, maintenance-free operating lifespan, combined with low power consumption.

Built to last it features a rugged, ABS case and impact-resistant Polycarbonate dome. Fully sealed and highly-resistant to dust and water ingress, it is rated to IP 67 and IP X9K and will even withstand high-pressure cleaning.

RotaLED Compact Class 1

RotaLED Compact Class 1 is a powerful warning beacon that meets SAE J845 Class 1 approval.

Using high power LEDs and advanced electronics it provides a highly visible rotating warning light pattern without the need for moving parts, ensuring greater reliability and a long, maintenance-free operating lifespan.

Built to last it features a rugged, ABS case and impact-resistant Polycarbonate dome. Fully sealed and highly-resistant to dust and water ingress, it is rated to IP 67 and IP X9K and will even withstand high-pressure cleaning.

HELLA MULTI-FLASH LAMP OPERATING MODES

Flashing Options	
Steady state	Lamp operates as a continuous ON signal
Independent flash	Lamp operates from an external flashing system
Flash state	Lamp operates in the flash mode preselected by the user
Blitz state	Lamp operates in a burst of quad flashes (pattern 4)

The blitz mode overrides the other operating modes and is triggered by switching the blue cable to negative (-).

Micro / Mini Lightbar

The Micro and Mini Lightbars combine a flashing and rotating signal in one product and generate an intense 360°-degree warning signal. Both warning lights are optimally protected against strong vibrations and therefore suitable for various applications.

Type Approval	SAE J845 Class 1	

BST Round

The BST-Round warning light is characterised by its new round design which allows flexible installation in different areas of the vehicle. Four power LEDs and high-quality precision optics generate an intensive warning signal with minimum power consumption.

The warning lights are supplied as a set consisting of a controller, two flasher heads and two mounting rings. The power supply cable has an open end and the mounting rings and mounting brackets allow easy and flexible installation. The BST-Round warning light is extremely temperature resistant due to the high-quality aluminium housing and will operate in a temperature range of - 40°C to + 80°C. The warning lights have different flash patterns, e.g. single flash or double flash. Further details on the different flash sequences can be found in the assembly instructions.

IP Rating	Lighthouse: IP 6X, IP X4K, IP X9K Controller: IP X7
Operating Temperature	-40°C to 65°C
EMC Interference Immunity	ECE-R10, CISPR 25 Class 3,
Type Approval	ECE R65 For 2XD 014 564-801: SAE J845 Class 1

BST Slim (3 LED)

The BST-Slim is a high-performance warning light with 3 or 6 LEDs.

There are different warning light colours and various flashing sequences which create a synchronous or alternating signal. The Dual Colour warning light is ECE-R65 type-tested and the rest are SAE approved. It can be used for single, double, triple and quadruple flash as well as with continuous light. Supplied as a set of two

BST Slim (6 LED)

The BST-Slim warning light with 6 LEDs provides a highly visible warning with the same flash patterns as its 3 LED counterpart, as well as a day/ night mode which adjusts the brightness to the ambient light for increased visibility during the day and avoidance of glare at night. Supplied as a set of two.

HELLA MULTI-FLASH LAMP OPERATING MODES

Signal Warning Lamp - 18 Flash Patterns

HypaLUME 110 / 240V AC

The 110/240V AC HypaLUME has been designed for applications where high output lighting in extreme environments is required.

Comprehensive sealing and anti-corrosion measures have been taken to ensure this lamp withstands the toughest conditions. The premium aluminium housing is corrosion resistant with a non-stick and easy to clean surface coating. The heavy duty Grilamid™ lens provides unbeatable protection against impacts and vibration, while providing long term UV stability and resistance to commonly used chemicals for the life of the product. The LEDs have a colour temperature of 5700K to provide a near daylight work environment that is optimal for fatigue avoidance and high alertness.

Type Approval	AS / NZS 60598.2.5

Lamp can be rotated 140°

HypaLUME 48V DC RfCommSafe

The HypaLUME 48V DC RfCommSafe™ has been designed for applications where high output lighting in extreme environments is required. The lamp produces a net output of 28000 lumens whilst only consuming 300W.

The LEDs have a colour temperature of 5700K to provide a near daylight work environment that is optimal for fatigue avoidance and high alertness.

The LED driver electronics ensure light output remains stable over a wide range of voltage variations. The built-in soft start feature eliminates a high in-rush current at start up.

HypaLUME 48V DC is designed to RfCommSafe™, ultra-low emission (EMC) requirements surpassing international standards by a wide margin.

Lamp can be rotated 140°

HypaLUME 24 / 48V DC

The HypaLUME 24/48V DC has been designed for applications where high output lighting in extreme environments is required. The lamp produces a net output of 25000 lumens whilst consuming less than 260W. Comprehensive sealing and anti-corrosion measures have been taken to ensure this lamp withstands the toughest conditions. The premium aluminium housing is corrosion resistant with a non-stick and easy to clean surface coating. The LEDs have a colour temperature of 5700K to provide a near daylight work environment that is optimal for fatigue avoidance and high alertness. The LED driver electronics ensure light output remains stable over a wide range of voltage variations. The HypaLUME is also protected from reverse polarity and short circuit faults.

Module 70 S

The Module 70 S series is the LED successor to the well-known, high-quality and yet affordable Module 70 work lamp.

The S series work lamp provides homogeneous illumination with a colour temperature of 6,500 kelvin, providing a similar light to daylight.

The housing and the cover lens are made of special plastics, which keep them very lightweight and provide a high level of corrosion resistance.

C140

The C140 LED is a combination headlight that features all light functions in LED technology: low beam, high beam, indicator and position light. A specially developed thermal design with temperature sensors prevents the headlight from overheating.

The housing of the C140 LED is made of aluminium and features cooling fins on its rear, which ensure heat removal from the high-power LEDs. A specially developed thermal design with temperature sensors prevents the headlight from overheating.

With its robust, heavy-duty bracket and a lens made of toughened, shatterproof plastic, the headlight is particularly resistant to vibration and impact. Ideal for the tough conditions on construction vehicles (strong vibrations, dust, moisture, mechanical shock, etc.).

The C140 LED headlight is a fully sealed, maintenance-free system: it obviates the need to replace bulbs, saving time and money for the final consumer. The low LED power consumption compared to conventional halogen headlights also saves fuel, further driving down costs.

Part No.	Mounting
1LE 996 374-031	Left side, horizontal
1LE 996 374-041	Right side, horizontal

Driving Lamp (ECE Ref. 40)

The RokLUME 380 N LED Driving Lamp (ECE Ref. 40) is an extremely durable wide spot light for road illumination. Using LED technology combined with state-of-the-art electronics, it provides a light output of up to 7800 lumens with a colour temperature of 5000K, yet power consumption is a highly efficient 84 W.

Originally developed to perform in the toughest operating environments such as mining, the RokLUME 380 N has a premium aluminium housing with NanoSafe coating (providing a non-stick and easy to clean surface), high-impact hard coated polycarbonate lens and heavy duty stainless steel surrounding bracket.

Ultra Beam LED Gen II

The popular Ultra Beam LED II series has now been expanded to include a Pencil Beam version. The light output is a powerful 4000 lumens with a colour temperature of 6500K. The light is distributed by a specially developed multi-faceted reflector and polycarbonate lens, thus ensuring homogeneous illumination. The integrated electronics protect the device in the event of polarity inversion and guarantee constant brightness, even when operating with voltage fluctuations between 9 and 33 Volts DC.

All dimensions in mm.

Black Magic Light Bar

HELLA Black Magic Light Bars feature a slim and edgeless design, fully blacked out (including mounting brackets) for a modern and attractive look. Despite their discreet appearances, they provide a powerful light output of up to 15,000 lumen for excellent visibility in off-road situations. The sleek, edgeless design prevents dust deposits from settling along edges, enabling HELLA Black Magic Lightbars to achieve the second highest rating for protection against dust and water ingress. Advanced electronics automatically controls their output to prevent overheating or LED failure in warmer temperatures, whilst increasing light output when the ambient temperature is low, for optimum performance under all conditions.

Power Consumption	<12W
IP Rating	Reverse polarity and transient spike circuit protection. IP 6K7 (Protection against dust and temporary water immersion) IP 6K9K (Protection against dust and high pressure/steam jet cleaning)
EMC Interference Immunity	ECE-R10

BL 470 Red LED Warning Lamp

BL470 Red LED warning lamp is fitted with the VISIOTECH technology. A special lens optic allows the light to converge and become so sharply focused that a strip-shaped warning line is projected onto the ground to create a no-go zone.

Double Bracket 8HG 958 139-851 available. See page 18.

HD Double Bracket Kit + 2 LED Light Bar 470

LED Licence Plate Lamp

LED Licence Plate Lamp. One lamp required for ADR compliance.

Part No.	Lens Type	Colour
2XD 958 130 661	Spot Beam	Red

Lens	Grilamid™ Nylon PA12
Current Consumption	Multivolt 12 / 24V DC
Power Consumption	36W Max
IP Rating	IP 6K7, IP 6K9K
Operating Temperature	-40°C to 60°C
EMC Interference Immunity	ECE-R10, CISPR 25 Class 5,

Part No.	Global Part No.	Type
2559-1	2KA 959 640-301	0.5m Cable

Voltage	Multivolt for optimum brightness in 12 and 24 volt systems
Power Consumption	0.5W
Mounting	Surface mount
IP Rating	IP 6K6, IP 6K7
Cable Length	Pre-wired with 0.5m of multi-core cable. Bulk pack pre-wired with 2.5m of multi-core cable. and includes mounting spacer
Compliance	ADR 48/00 ECE R4/00

MotoVox Compact 112 dB Horn

Solid state electronic horn designed for extremely long life and to replace high maintenance electromechanical horns. This model is designed to meet or exceed all applicable SAE specifications. Used by major OEMs.

Part No.	Global Part No.	Type
HMF312P	3TA 910 156-021	12-24V DC, bare wire connection
Volume	112 db @ 1.2 m	
Approvals	SAE J1105 Sept 89, Type K. U.L. recognised for electric vehicles and fork lifts	

MotoVox Forward 117 dB Horn

Electronic forward horn is designed to be used where a high-decibel rugged horn is necessary.

Part No.	Global Part No.	Type
HMFH117P	3TA 910 156-011	12-24V DC, bare wire connection
Volume	117 db @ 1.2 m	
Approvals	SAE J1105 Sept 89, Type J @ 24 V systems SAE J1105 Sept 89, Type K @ 12 V systems	

Compact Reverse and Warning Alarm BM10

Ideal for light commercial vehicles, the BM10 reversing alarm is available with a long-range, penetrating 97dB(A) or 107 dB(A) alarm sound. IP67 rated, with an ABS housing and insulated electronics, it has high protection against failure due to rust, moisture and vibrations

Part No.	Noise Output Type	Output - L ^p @ 1.2m, dB(A)
3SL 009 148-177 (6015)	Standard	97
3SL 009 148-187	Standard	107
3SL 009 148-197 (6009)	Standard	97
3SL 009 148-207 (6010)	Standard	107

Electrical Connection	2 bolt (-177 and -187), 2-Pin DT Type Socket with 140mm lead (-197 and -207)
Voltage	12 – 48 V DC
Power Consumption	12 W
Frequency	700 – 2,800 Hz
Temperature	Operating range -40 °C to 85 °C
Protection	IP 67
EMC Interference Immunity	ECE-R10 SAE J994
Housing	ABS

White Noise Reverse and Warning Alarm BM20

Providing a white noise warning signal for reduced noise pollution, the BM20 reversing alarm is available with outputs of 92, 97 or 102 dB(A), as well as a version with a smart self-adjusting 92-102 dB(A) output level. IP67 rated, with insulated electronics, it has high protection against failure due to rust, moisture and vibrations.

Part No.	Noise Output Type	Output - L ^p @ 1.2m, dB(A)
3SL 996 139-501 (6015)	White noise	97
3SL 996 139-511 (6052)	White noise	97
3SL 996 139-521	White noise	102
3SL 996 139-531	White Noise	97-102, self-adjusting

Electrical Connection	with 140 mm cable and DEUTSCH connector
Voltage	12 – 32 V DC
Power Consumption	12 W
Frequency	600 –1600 Hz
Temperature	Operating range -40 °C to 85 °C
Protection	IP 6K7 (Protection against dust and temporary water immersion)
EMC Interference Immunity	ECE-R10 SAE J994
Housing	PA66+15% GA

Heavy Duty Reverse and Warning Alarm BM30

Ideal for heavy duty commercial vehicles, the BM30 reversing alarm is available with a long-range, 107 dB(A) or 112 dB(A) alarm sound, as well as a version with an 87 – 112 dB(A) volume level that automatically monitors ambient noise and adjusts to its environment.

Features a glass-filled nylon housing with integrated mounting bracket. IP67 rated, with insulated electronics, it has high protection against failure due to rust, moisture and vibrations.

NEW

Heavy Duty White Noise Reverse and Warning Alarm BM40

Ideal for heavy duty commercial vehicles, the BM40 reversing alarm is available in variants with white noise or standard (tonal) noise profiles. Noise outputs are either switchable or variable with a smart self-adjusting output function that automatically monitors ambient noise and adjusts to its environment.

Features a glass-filled nylon housing with integrated mounting bracket. IP67 rated, with insulated electronics, it has high protection against failure due to rust, moisture and vibrations.

NEW

Part No.	Noise Output Type	Output - L ^p @ 1.2m, dB(A)
3SL 996 139-247	Standard	107
3SL 996 139-257	Standard	112
3SL 996 139-277	Standard	87 – 112, self adjusting

Electrical Connection	with 140 mm cable and DEUTSCH connector
Voltage	12 – 48 V DC
Power Consumption	12 W
Frequency	700 – 2,800 Hz
Temperature	Operating range -40 °C to 85 °C
Protection	IP 67
EMC Interference Immunity	ECE-R10 SAE J994
Housing	Glass-filled nylon

Battery Master Switch

Double-pole, 2-position (off-on) Battery Master Switch with plated steel case designed to disconnect both battery and field circuit. Actuated by chrome-plated die-cast lever. Part No. 4643 features silver laminated contacts.

Battery Master Switch (Weatherproof)

Weatherproof double-pole, 2-position (off-on) Battery Master Switch featuring plated steel case, silver laminated contacts and O-ring seal to protect from dirt and moisture. Also features index pin to align unit and prevent rotation.

Heavy Duty Battery Master Switch

For trucks, buses and earth moving equipment. Complete with removable key.

Battery Master Lockout Switch - 2 Pole

Heavy-duty 2-pole lockable battery lock out switch. The Battery lockout switch provides a reliable power disconnection and safety cut-off that protects the vehicle against tampering, theft and battery drain. It also protects service personnel from electrical hazards during service operations.

Part No.	Global Part No.	Variant
4642	6EK 905 424-001	Standard Contact
4643	6EK 905 424-011	Silver Laminated Contacts

Mounting	19mm diameter opening
Maximum Load	1000A at 6-36V DC intermittent
Maximum Continuous Load	125A at 6-36V DC continuous (large studs) 20A continuous (small studs)
For Panels	Up to 4.75mm thick
Spare Part	4645 Key 1
Accessories	4646 Face Plate 2

Part No.	Global Part No.	Variants
4644	6EK 905 424-021	Silver Laminated Contacts

Mounting	19mm diameter opening.
Maximum Load	1000A at 6-36V DC intermittent
Maximum Continuous Load	125A at 6-36V DC continuous (large studs) 20A continuous (small studs)
For Panels	Up to 6.75mm thick.
Spare Part	4645 Key 1
Accessories	4646 Face Plate 2

Part No.	Global Part No.	Positions
4653	6EK 001 559-002	OFF-ON

Mounting	22mm diameter opening
Maximum Load	12V DC 5000A for 10 seconds 24V DC 2500A for 10 seconds
Maximum Continuous Load	12 / 24V DC 100A continuous at a maximum ambient temperature of 60°C with 50mm2 lead connected with ring-type terminals
Termination	2 x 10mm studs
Protection	IP X4 (Protection against water splashing)
Spare Part	4654 Spare key

Switch not designed for marine applications.

Part No.	Global Part No.	Variants
HM7592B	9MK 910 109-001	Red handle
HM7592Y	9MK 910 109-011	Yellow handle

Mounting	Sealed design allows switch to be mounted in the best location regardless of environment.
Operating Temp.	-40°C to 85°C
Protection	Waterproof and dustproof to IP67

Battery Master Lockout Switch - 4 Pole

Heavy-duty 4-pole lockable battery lock out switch. The Battery lockout switch provides a reliable power disconnection and safety cut-off that protects the vehicle against tampering, theft and battery drain. It also protects service personnel from electrical hazards during service operations. Isolates of both positive and negative sides from the battery, or isolation of one circuit with only one switch.

Heavy Duty Battery Master Switch

Extremely robust, single-pole (2 post) Battery Master Switch featuring double-cut copper contacts. Supplied complete with removable handle, security chain and PVC protective cover. Suitable for industrial vehicles and agricultural machinery.

Relays

Weatherproof Changeover Relay and Connector Assembly Kits.

Part No.	Global Part No.	Variants
HM7591S	9MK 910 109-201	■ Silver Laminated Contacts

Mounting	19mm diameter opening
Operating Temp.	-40°C to 29°C
Maximum Load	125A at 6-36V DC continuous
Protection	Waterproof and dustproof to IP67

Part No.	Global Part No.
4655	6EK 905 397-001

Mounting	24mm diameter opening
Maximum Load	2500A at 12-24V DC for 5 seconds
Maximum Continuous Load	250A at 12-24V DC continuous
Protection	IP 66
Spare Parts	4655COV Strap & PVC Protective Cover 1 4655KEY Handle, Chain & Protective Cover 2

Part No.	Global Part No.	Rating
HMWPR001	8KW 910 182-001	12V
HMWPR002	8KW 910 182-011	24V

Operating Range	-40°C to 125°C
Contact Current Rating	12V NO 35A / NC 20A 24V NO 40A / NC 30A
Coil Resistance	12V 70-90 Ohms @ 23°C 24V 300 Ohms
Transient Suppressor Resistor	12V 680 Ohms 24V 2700 Ohms
Kit Contents	ISO mini relay and connector assembly kit contains: 1 x ISO-style changeover relay. 1 x Connector body with seals for pull to seat terminals. 3 x Large barrel pull to seat terminal 6.3mm width suits cable size 3.00mm² 2 x Small barrel pull to seat terminal 6.3mm width suits cable size 1.00 - 2.00mm²

Mining E-Stop

The Mining E-Stop offer versatility, safety and fast installation. This Heavy Duty unit features LED illumination visible from 3 sides for added safety, a user-friendly 60mm push button, DT connection and direct mount capability. It is a fully-sealed, pressure tested unit, IP 6K9 / IP 6K8 rated.

Jump Start System

Heavy duty, high capacity jump-start connectors for vehicles and equipment, ideal for use where access to terminals is restricted or dangerous. Eliminates chance of cross polarity connections through the specially shaped plug and reduces chance of sparking and possible ignition of flammable materials.

Mounting bracket, protective cap, and kit containing the terminal, bracket and cap are also available. Suitable for 70 mm2 cable. Connection via crimping and soldering process.

AC / DC Converter

AC / DC Electronic Transformers allow low voltage DC lighting to be used where AC mains power is available. The converters are fully sealed to IP67 for the vigorous demands of mining.

Part No.	Global Part No.
HM7593E	6HF 012 416-001

- Features and benefits:**
- Added safety through illumination via LED (visible from 3 sides)
 - IP 6K9 und IP 6K8 rated fully-sealed, pressure tested unit
 - "Plug and Play", supplied with mating DT Connector
 - High visibility yellow powder-coated 316 Stainless Steel
 - User friendly, large 60 mm mushroom button
 - Two normally closed and one normally open contacts (each rated 10A)

Jump Start Plug		
Part No.	Global Part No.	Description
HM7546P	8JA 177 305-101	High impact ABS plastic. Copper (silver brass coated) terminals

9.HM4959	1	Locking Wedge and Contact Pin Release Tool
HM8275	1	Premium Contact Crimping Tool – Adjustable
HM8277	1	DT Contact Crimping Tool – 0.5 - 1.0mm

Handy Box® DT Connector Kit

The Handy Box® DT Connector Kit (incl. Crimping Tool HM8277) contains 258 of the most popular DT Connectors including tools. All parts in the kit are available as spares.

Insulated Terminal and Connector Kit 1025 Piece

This professional assortment containing 1025 HELLA Connectors / Terminals (incl. Ratchet Crimping Tool 8273) is designed to meet the requirements of the mining industry. Includes a quantity of 20 complete packs.

Handy Box® DT Connector Kit HM8292
Contents:
10 x 2-Way Male DT Connector incl. Wedge
10 x 3-Way Male DT Connector incl. Wedge
8 x 6-Way Male DT Connector incl. Wedge
10 x 2-Way Female DT Connector incl. Wedge
10 x 3-Way Female DT Connector incl. Wedge
8 x 6-Way Male DT Connector incl. Wedge
100 x Male DT Connector Socket
100 x Female DT Connector Socket
1 x Crimping Tool
1 x DT Wedge Removal Tool

8513	100	6.3mm	2.5 To 3mm cable 0.75 To 1.13mm² cable
8514	100	6.3mm	4mm cable. 1.84mm² cable
8515	100	6.3mm	5 To 6mm cable 2.9 To 4.59mm² cable
Male Bullet Connector			
8520	100	-	2.5 To 3mm cable 0.75 To 1.13mm² cable
8521	100	-	4mm cable. 1.84mm² cable
Female Bullet Connector			
8522	100	-	2.5 to 3mm cable 0.75 to 1.13mm² cable
8523	100	-	4mm cable 1.84mm² cable
Cable Connector			
8530	100	-	2.5 to 3mm cable 0.75 to 1.13mm² cable
8531	100	-	4mm cable 1.84mm² cable
8532	100	-	5 to 6mm cable 2.9 to 4.59mm² cable
Eye Terminals			
8541	100	5mm	2.5 to 3mm cable 0.75 to 1.13mm² cable
8543	100	5mm	4mm cable. 1.84mm² cable
8544	100	6.3mm	4mm cable. 1.84mm² cable
8546	50	6.3mm	5 to 6mm cable 2.9 to 4.59mm² cable
8547	50	8.4mm	5 to 6mm cable 2.9 to 4.59mm² cable
8548	50	9.5mm	5 to 6mm cable 2.9 to 4.59mm² cable
Crimping Tool			
8273	1	Crimps for 2.5 - 6mm dia. cable	Adjustable ratchet mechanism and spring release ensures a perfect crimp every time for insulated terminals.

CONSTRUCTION AND MEANING OF THE IP (INGRESS PROTECTION) CODE

The specification of a degree of protection for protection against access and foreign object includes all lower degrees of protection.

The degrees of protection 1 to 6K for protection against water include all the lower degrees of protection.

Due to different physical affects, this does not automatically have to apply to water protection grades 7, 8 and 9K.

- Code letters (Ingress Protection)
- First characteristic numeral (Numerals 0 to 6 or letter X)
- Second characteristic numeral (Numerals 0 to 8 or letter X)
- Additional letter (optional) (Letters A, B, C, D)
- Supplementary letter (optional) (Letters M, S) (Letter K)

Element	Numeral/ letter	Meaning for the protection of electrical equipment	Meaning for the protection of persons
First characteristic numeral / supplementary letter		Against the ingress of solid foreign objects (including dust):	Against access to hazardous parts (unless described by extra letters):
	0	Not protected	Not protected
	1	With Ø ≥ 50 mm	With back of hand
	2	With Ø ≥ 12.5 mm	With finger
	3	With Ø ≥ 2.5 mm	With tool
	4	With Ø ≥ 1 mm	With wire
	5K	Dust-protected	With wire
Second characteristic numeral / supplementary letter	6K	Dust-tight	With wire
		Against the ingress of water:	
	0	Not protected	
	1	Vertical dripping	
	2	Dripping (inclined 15°)	
	3	Spraying	
	4	Splashing	
	4K	Same with increased pressure	
	5	Jetting	
	6	Powerful jetting	
	6K	Same at increased pressure	
	7	Temporary immersion	
	8	Continuous immersion	
Additional letter (optional)	9K	High-pressure / steam jet cleaning	
			Against access to hazardous parts (unless described by first characteristic numeral):
	A		With back of hand
	B		With finger
	C		With tool
Supplementary letter (optional)	D		With wire
		Meaning for the protection of electrical equipment:	
	M	Movement of moving parts during water test	
	S	Standstill of moving parts during water test	
	K	Specifically for the electrical equipment in road vehicles
