

Faurecia

Both automotive suppliers work on joint solutions for the vehicle interior of the future. Faurecia contributes its competence as an integrator of complete systems. HELLA on the other hand delivers innovative products in the area of interior lighting (Start 11/2018).

OPEN PARTNERSHIPS

Plastic Omnium

The partnership will focus on accelerating the holistic integration of lighting technologies into the vehicle body. HELLA will contribute its expertise in the field of automotive lighting technology to the cooperation, while Plastic Omnium will contribute its expertise in plastics processing for exterior body parts (Start 01/2019).

OPEN PARTNERSHIPS

ZF

Both suppliers benefit from the partnership in the field of sensor technology, especially for front-camera systems, image recognition and radar systems. Thereby HELLA is able to further accelerate the development of its core technologies. In addition to that, HELLA Aglaia jointly works with other partners on camera based driver assistance systems (Start 06/2017).
