 Green : Mobile phone connected

SPECIFICATIONS

1 Hardware

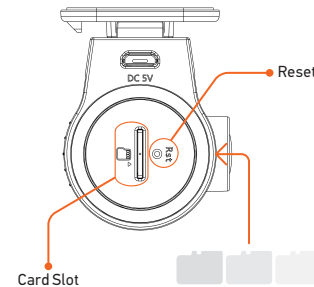

CPU	Hisilicon3516C_V200
Image sensor	Panasonic CMOS sensor
Lens	6-glasses, 150° Wide Angle, F1.8
Wi-Fi	2.4GHz, 802.11b/g/n
G-sensor	three-axis accelerometer

2 Technical Parameters

Video Information	1920*1080(16:9), @30fps, *.mp4
Audio Information	8KHz, 2 channels, AAC
Photo Information	1920*1080, *.JPG
Storage	Class 10 TF card, up to 64GB
Working Temperature	-20°C to 70°C
Working Voltage & Current	DC 5V & 1A
Video Processing	3D denoising, image enhancement, LDC correction, etc.

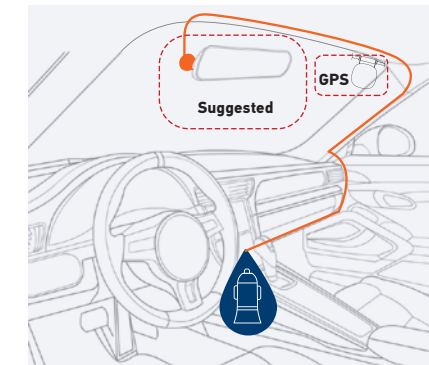

OPERATING INSTRUCTIONS

1 Insert TF Card

Dashcam supports up to 64GB TF card, and Class 10 TF card is required.

2 Dashcam Installation

2.1 The Dashcam should be installed on the interior surface of the windshield and near the rear-view mirror without obstruction.

2.2 Connect the USB power cable with Dashcam and car charger, concealing the cable as per sketch map above.

2.3 When the vehicle is started, the Dashcam will boot up automatically with an audio greeting "Hello".

3 Connect The Dashcam to Mobile Phone

Settings --- WLAN --- Select "M-XXXX" --- Enter password "12345678" --- Join --- HELLA DVR - DR 530.

4 Smart Gesture Sensing

Activate Smart Gesture Sensing by waving your hand under the Dashcam to take a photo while driving. Change setting in the "Capturing photo and video" APP option to also record a 25 seconds short video (first 5 seconds and last 20 seconds) with Smart Gesture Sensing.

You can download the photos to your mobile phone from the "Gallery Photos" section of the APP. As for the videos, you can download them to your mobile phone from the Dashcam Videos "Clips" section of the APP.

5 GPS Module (Optional)

The GPS Module is embedded in the power cable, which tracks the location and speed of vehicles and records your trip.

NOTE: For faster location detection, the GPS must be pasted away from the Dashcam (Refer to pg. 6 diagram for suggested installation location).

6 Vehicle Battery Protection Module (Optional)

In order to prevent the car battery from unnecessary discharge during parking mode, the Vehicle Battery Protection Module will monitor and cut off power supply to the Dashcam when the battery voltage falls below 11.5 V.

7 Fatigue Alert

Voice reminder alert will be activated every 2 hours for long haul driving. This feature can be activated through the APP.

8 Remote Access (Always Connected)

On Live Real-time video can be viewed through the APP when connected.

Playback Play video stored in your Dashcam anytime on your smartphone or tablet.

9 Update

The Dashcam has an OTA updating system, you will receive the latest firmware by the Dashcam APP. Click the "Send Firmware and Upgrade" in the Dashcam settings to complete the updating.

10 Other Settings

Enter the settings page to modify the general settings. You can change the G-sensor sensitivity, mic switch, volume, etc.

11 Reset

Press the reset button for a few seconds to reset Dashcam, the default Wi-Fi password is 12345678.

12 Disclaimer

• This device is NOT intended to be used for illegal purposes, surveillance and shall not be used in any form as evidence for claim purposes.

• Some countries prohibit drivers from mounting anything on the windshield, or restrict mounting to specific areas of the windshield. It is the owner's responsibility to mount the device in compliance with local laws.

• Errors may occur depending on the surrounding environment and the voltage of the car.
