

# HELLA PAGID TWO PIECE ROTORS

These advanced, two-piece brake discs feature an aluminum hat and a High Carbon friction ring, which are bonded together by rivets. The use of aluminum delivers a weight savings of 15-20 percent and reduces the unsprung mass of the brake system. The resulting assembly not only improves driving properties, but also helps contribute to a reduction of fuel consumption.

Hella Pagid composite brake rotors are designed to match perfectly with Hella Pagid Brake System brake pads and wear sensors to deliver maximum performance in terms of safety, comfort and service life. Every Hella Pagid composite brake rotor is manufactured in accordance with strict OE tolerances.

- **Manufactured in Europe**
- Improvement in driving properties
- **High Carbon** friction ring
- Reduction of fuel consumption
- Full range of **BMW** applications
- Less prone to warpage
- Quieter operation
- Easy installation
- Keeps rotors looking great for miles
- No cleaning required
- OE design
