## COMET FF

### The complete elegance of light

Smooth lines and compelling functionality ideally combined in a fascinating headlight series: The name Comet marks a great moment of lighting technology.

The complete COMET FF product family consists of six models. Besides the proven models COMET FF 100, FF 200 and FF 300, also the larger models COMET FF 450, FF 500 and FF 550 have been available since 2011 in a completely revised design with an optics-free clear glass lens.

COMET FF delivers a sleek vehicle appearance. The new rectangular, oval and round models provide maximum harmony with the shaping of modern vehicles. Design appeal which comes into its own not only through individualisation of the vehicle, but deliberately also by the selection of the appropriate headlight design.

## COMET FF – For those who decide themselves where to go.

The new COMET FF auxiliary headlights are the perfect lighting solution for anyone looking for good visibility while valuing good looks. Whether off-road in the country or in the urban jungle: The new COMET FF models are the right choice in any environment at any time of day or night.

Using proven halogen technology, the new free-form reflectors deliver excellent lighting performance. High-quality workmanship using glass and plastic components guarantees a long service life. The extensive clear glass lens provides excellent visibility in all weathers.

### Striking design for modern vehicles

Off-roaders, pick-up drivers, SUV cruisers and all those who value the individual style of their vehicles – the new generation of HELLA auxiliary headlights was designed specifically for the style of modern vehicles.

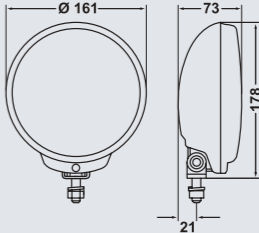

Due to the low installation depth, the new COMET FF can be easily mounted on almost any vehicle. The new model variants FF 450, FF 500 and FF 550 permit the same installation and assembly options as their predecessor series.

THE NEW RANGE: COMET FF 450 / FF 500 / FF 550

## LIGHTING IN A NEW DESIGN

The COMET FF range offers a new design and technology in various designs. The robust plastic housing was combined with a modern design and optics-free and brilliant clear glass look. In addition, free-form reflectors with computer-calculated light distribution provide for powerful lighting performance.

Available as spotlights and fog lights, the COMET FF models are the perfect complement to the standard equipment of modern vehicles.
