

New LED bay light from HELLA

Flexible illumination, reduced installation and maintenance costs and demand-driven approach make LED bay light from HELLA the ideal lighting for Industrial facilities and warehouses

Lippstadt, Germany, 10 September 2015. Brighter and better light for industrial facilities, plants and warehouses: HELLA has developed a new bay light to meet the special requirements created by large spaces with high ceilings. DIY stores, boatbuilder's yards, trade fair or exhibition halls and chilled warehousing – the IL One Highbay bay light has a multitude of uses. HELLA is adding this LED lighting solution to its portfolio where it will join the IL 2 PLUS light line system.

With up to 264 single LEDs, the bay light has two beam angles (90 and 120 degrees) which can be adjusted to shine where required, allowing optimum light distribution throughout the space. Various optics and reflectors allow the lighting to be adapted to the individual requirements of different buildings. Furthermore, the modular construction and the particularly robust design reduce time and effort spent on installation and maintenance. Integrated sensors ensure that the light is only fully illuminated when it is required. This demand-driven approach allows savings beyond those delivered by the normal reduction in consumption that results from using LED technology. Furthermore, the bay light can be used with traditional 250 or 400 watt HQL lamps.

HELLA KGaA Hueck & Co., Lippstadt: HELLA is a global, family-owned company, listed on the stock exchange, with more than 30,000 employees at over 100 locations in more than 35 countries. The HELLA Group develops and manufactures lighting and electronic components and systems for the automotive industry and also has one of the largest retail organizations for automotive parts, accessories, diagnostics, and services within Europe. Complete vehicle modules, air-conditioning systems, and vehicle electrical systems are also produced in joint venture companies. With more than 6,000 people working in research and development, HELLA is one of the most important innovation drivers on the market. In addition, with preliminary sales of approx. 5.8 billion euros in fiscal year 2014/2015, the HELLA Group is one of the top 40 automotive parts suppliers in the world and one of the 100 largest German industrial companies.

**HELLA Industries – a business segment of HELLA KGaA Hueck & Co.:**

In order to strategically broaden its business basis, HELLA has been systematically developing new customer target groups in the Industries business sector. The primary focus of this strategy is to transfer the strong product, technology and process knowledge from the automotive core business to attractive applications in other sectors. The first step focuses in particular on innovative solution approaches for lighting for roads, industrial lighting, building interiors and airfield lighting.
