

New LED panel light for offices and shops from HELLA

Efficient lighting, simple and stylish design and easy mounting thanks to standard dimensions

Lippstadt, Germany, 10 September, 2015. Offices and schools, conference rooms or sales spaces - good light is essential everywhere. This is why HELLA the lighting expert is constantly extending its range of lighting products with LED technology. The panel lights in the Office Eco series are a new solution for office space. They are particularly efficient thanks to LEDs, which are now established as the primary light source of choice for many areas of life. The semi-conductors are extremely economical, produce more pleasant light that is similar to daylight and have a service life of around 60,000 operating hours, which is equivalent to 12 years on average.

The Office Eco series panel lights come in standard dimensions which allows them to be installed in grid ceilings with no problems at all. Thanks to their simple yet stylish design, the lamps merge with the overall decor and provide excellent lighting without distracting. HELLA offers additional installation kits with which it is possible to fit the panel lights to the surface of the ceiling.

Different studies have shown that light affects both mood and concentration in humans. Despite the knowledge of how light can impact on a space, few offices, classrooms and conference rooms have been converted to use modern LED lamps. People who work in poor light often tire more quickly and suffer more frequently from headaches and a lack of concentration. These problems increase the further the workstation is from a window. It is not just the low illuminance that is the problem, but also the spectral composition, also known as the color, of the light source. Put simply, a warm white light has a calming effect; cold white light with a proportion in the blue part of the spectrum is stimulating, because it is similar to daylight and supports the biorhythm. The Office Eco series from HELLA meets these requirements and provides homogeneous illumination. HELLA also offers a special variant for workstations with screens, classrooms and work

involving close inspections. It meets the requirements of the unified glare rating (UGR 19).

HELLA KGaA Hueck & Co., Lippstadt: HELLA is a global, family-owned company, listed on the stock exchange, with more than 30,000 employees at over 100 locations in more than 35 countries. The HELLA Group develops and manufactures lighting and electronic components and systems for the automotive industry and also has one of the largest retail organizations for automotive parts, accessories, diagnostics, and services within Europe. Complete vehicle modules, air-conditioning systems, and vehicle electrical systems are also produced in joint venture companies. With more than 6,000 people working in research and development, HELLA is one of the most important innovation drivers on the market. In addition, with preliminary sales of approx. 5.8 billion euros in fiscal year 2014/2015, the HELLA Group is one of the top 40 automotive parts suppliers in the world and one of the 100 largest German industrial companies.

HELLA Industries – a business segment of HELLA KGaA Hueck & Co.:

In order to strategically broaden its business basis, HELLA has been systematically developing new customer target groups in the Industries business sector. The primary focus of this strategy is to transfer the strong product, technology and process knowledge from the automotive core business to attractive applications in other sectors. The first step focuses in particular on innovative solution approaches for lighting for roads, industrial lighting, building interiors and airfield lighting.
