

## **New in the product range: Water pumps for commercial vehicles**

**Behr Hella Service adds approximately 100 commercial vehicle water pumps for all common vehicle makes to its portfolio**

**Schwäbisch Hall, September 21, 2015.** Thermal management experts Behr Hella Service have made a comprehensive expansion to the company's range of water pumps and water pump kits. Around 100 commercial vehicle water pumps are now available for all common vehicle makes in tried-and-tested Behr Hella Service quality. All important information on the new product range for commercial vehicles is always up to date in TecDoc and, starting in Spring 2016, also in the new "Thermal Management for Commercial Vehicles and Transporters" catalog.

Water pumps are indispensable for water-cooled internal combustion engines because they keep the cooling circuit moving by continuously recirculating the coolant. This is why water pumps are among the most frequently requested spare parts and have enjoyed a very well-established position in Behr Hella Service's product offering for years – as single spare parts or easy-to-install complete kits.

Behr Hella Service covers all areas in modern thermal management – cooling, ventilation and air-conditioning – and provides an optimal service package: a comprehensive product portfolio of more than 6,500 quality parts, covering all cases of need and all common European and Asian vehicle makes, combined with Behr's decades of expertise in original equipment manufacturing. The aftermarket and garages in the independent aftermarket sector continue to benefit from very high part availability, which is achieved by the HELLA global logistics network. Behr Hella Service also provides appealing sales support and practically oriented technical service.

## PRESS RELEASE

**Behr Hella Service GmbH, Schwäbisch Hall:** The joint venture between automotive parts suppliers Behr (specialist for vehicle air conditioning and engine cooling) and Hella (specialist for components and systems for lighting technology and electronics) serves the global independent aftermarket for vehicle air conditioning and engine cooling parts. The joint venture combines Behr Service's activities on the independent aftermarket and the air-conditioning business of the Hella retail organization. Behr and Hella each have a 50% share in the joint venture. The combination of Hella's global sales organization with Behr's product know-how and the linking of activities in the field of vehicle air conditioning and engine cooling for the parts business is the logical further development of the previous cooperation between Behr and Hella in the field of climate control and front-end modules.
