

INTRODUCING THE BLACK MAGIC
**TOUGH PRO
& PRO TWIN**

MADE TO CONQUER EXTREMES

The new HELLA Black Magic Tough Pro series takes performance lightbars to the next level – stronger, smarter, and tougher than ever.

With 27 new models featuring flashers, moving position light, SingleTwin Function, heated lens, and High Boost mode, this range delivers uncompromising performance whether on-road, off-road, or on the job.

1FJ 358 550-401

BUILT TO SURVIVE IT ALL

From the frozen Arctic to desert heat, Black Magic Tough Pro lightbars are built for endurance.

Each housing is electrophoretically coated for superior corrosion resistance and features an advanced sealing system to prevent water ingress. Certified to IP68 and IP69K, they withstand dust, water and high-pressure cleaning without compromise.

AUTOMATIC HEATED LENS

Cold, snow, or ice? No problem. Selected models include an automatic lens heating system that activates below 5°C, switches off at 35–45°C, and re-engages if the temperature drops below 25°C. A small indicator LED confirms when heating is active – ensuring consistent visibility in all weather.

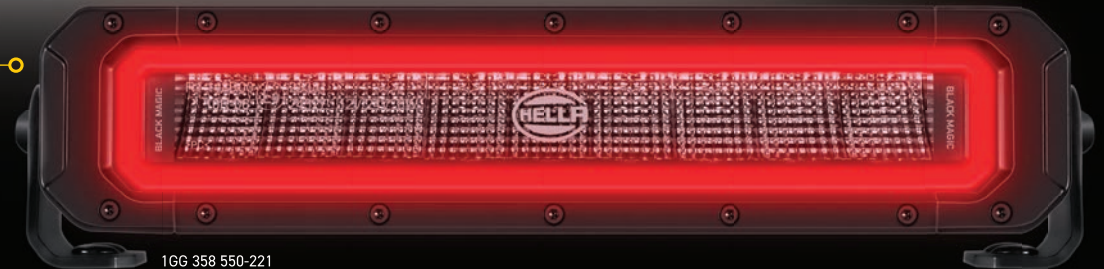

1FJ 358 550-301

DYNAMIC POSITION LIGHT & SIGNATURE EFFECT

Each Tough Pro lightbar features a two-colour position light – white/amber or red/amber – with fully configurable lighting sequences.

The innovative Welcome and Goodbye function adds a moving light signature.

1GG 358 550-221

PRODUCT FEATURES AT A GLANCE

- White/amber or red/amber position lights with configurable modes
- Welcome & Goodbye moving light signature
- High Boost mode for maximum performance up to 12,942 lm
- Up to 10 synchronisable flash functions
- Automatic heated lens on select models
- Reinforced anti-corrosion housing with electrophoretic coating
- Improved sealing system for maximum water resistance
- Single and double-row designs for all applications

FLASH FUNCTIONS

Several models in the Tough Pro range includes integrated flasher functionality, offering up to 10 selectable patterns that can be synchronised across multiple units.

LET THERE BE WHITE...

Available in 9", 15" and 21" sizes, the optional white bezel [and matching fixing kit] give the Black Magic Tough Pro a clean, contemporary look that complements light-coloured vehicles and custom builds.

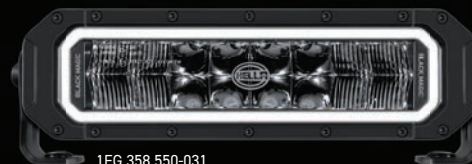

SEEING DOUBLE

The Black Magic Tough Pro lineup includes both single and twin lightbar designs with slim and dual light modules. Each variant is built around a reinforced anti-corrosion housing with a tested sealing system to prevent water ingress, and both achieve IP68 / IP69K protection with an operating temperature range from -30°C to +65°C.
