

BRIEF INFORMATION

LED retrofit lamps

- High level of brightness
- Faster response time
- Longer lifetime
- Intense and high-contrast light thanks to powerful LEDs
- Energy efficiency

PRODUCT FEATURES

Not only stylish and cool on the outside – modern light in the vehicle interior in no time at all

A large share of vehicles already use LED lighting. Intelligent lighting systems with LEDs are opening up more and more new possibilities, not only in the area of headlamps and rear lamps. It is also moving more and more into focus in vehicle interiors. This is because there are a wide variety of possible applications for stylishly designing the interior with LED retrofit lamps from HELLA. The light produced by the lamps is not only stylish and cool, it also illuminates the vehicle interior as if it were broad daylight.

In addition to the brightness that can be achieved, the LED retrofit lamps are particularly convincing due to their increased energy efficiency and lifetime*. Upgrading to LED technology is extremely easy thanks to the "plug-and-play" principle. Different light colours are available: between 4,000 K and 6,000 K.

*Compared to standard bulbs

DISCLAIMER: This product is not approved for use on public roads and does not have ECE approval. Depending on local regulations, using this product on the road for outdoor applications may result in the operating licence being withdrawn and loss of insurance cover. It is your own responsibility to comply with local legal requirements. If warning signals appear on the dashboard after installation, an additional CANbus may be required. For further information, please contact your specialist garage.

PROGRAM OVERVIEW

Product image	Part number	Base	Voltage	Power	Colour temperature	EAN
LED-Festoon 36 mm						
	8GL 178 560-551	SV8.5-8	12 V	1 W	4,000 K	4082300557671
	8GL 178 560-561				5,000 K	4082300557688
