

RTK INNOVATIONS⁷

LED work lights:

- 4 LEDs for intensive close-range illumination
- Placement possible to the front and to the rear

Auxiliary flasher, blue:

- Auxiliary, wide-range warning signal
- As an additional option in the domes or in the central section of the unit to the front and to the rear

AUXILIARY FLASHERS

The RTK⁷ can be fitted with blue auxiliary flashers in three different kinds of mounting options.

- 1) Installation in the domes each time with 2 devices to the front and 2 to the rear

- 2) In the central section of the unit with 2 devices to the front and 2 to the rear

- 3) Or as a double fixture fitting right and left in the central section and directed to the rear, with a total of 4 devices

RTK MODULE OVERVIEW⁷

KL-LM 2/4

KL-LM 3

KL-LM 5/6/7

Auxiliary flashers

Alley lights

Work lights

Hazard blinking lights modules/
direction indicators

Long-range flash module BSF-LED

Infrared module

LED stop signaling device ASG

LED signal bar LSB

RTK MODULE OVERVIEW⁷

Backlighting module

- LED technology
- For housing widths of 900 mm up to 1,600 mm
- Front and/or rear

KL-A plug-in beacon

Control unit HA 115 and HA 112

External LED stop signaling device ASG-E

Internal acoustic module LSP-I front and/or rear

External acoustic module LSP-E for offset assembly

HELLA offers solutions for digital and analog operation.
