Trouble codes

Trouble codes: 14226597 / (Original trouble code: D914A5)
CAN bus connection to engine ECU

Data for engine torque missing/wrong

Function:
➤ Engine system and often individual components (oil sensor etc.) exchange data with other system ECUs through the engine CAN bus.

Info:
Data transfer via CAN but not via "normal" data lines can be recognised by the cable type. A CAN bus mostly consists of two cables, which are twisted and interlaced to compensate possible interferences.

General trouble code diagnostics

Possible effects:
➤ data exchange disturbed
➤ Incorrect function of cross-linked systems
➤ Jerking
➤ Fault lamp on (possibly)

Deleting fault codes
