

Opel Adam - Raccords de service du système de climatisation | HELLA

Opel

Adam

Année modèle: à partir de 10.2012

Raccords de service du système de climatisation

Lors de l'entretien, les conducteurs posent souvent la question suivante : "où se trouvent les raccords de service ?"

Les raccords de service (haute et basse pression) se situent dans le compartiment moteur devant à droite entre le boîtier de filtre à air et le projecteur principal.

Afin d'accéder aux raccords, il faut tout d'abord démonter le tube d'aspiration d'air (figure 1)

Il est ensuite possible d'accéder aux raccords (figure 2).
