Data sheet

Manufacturer	Volvo
Vehicle model	V60 / S60
Engine	All
Year of manufacture	2012 - 2018
Symptoms	Renewing pollen filter

Important safety note

Changing cabin filter / pollen filter

When replacing the cabin filter in the above-mentioned vehicles, there are a few special features to bear in mind:

- Remove the right panelling from the centre tunnel
- Remove the panelling under the glove compartment and also disconnect the footwell lamp connector
- Pull the carpet forwards. Fuse box is now visible
- Remove the cover of the fuse box
- Unlock and remove the fuse box or put it to one side. Access to the filter flap is now free
- Remove the flap from the ventilation shaft
- Pull out the filter
- Insert new filter, paying attention to the installation position

Reassemble everything in reverse order.

document source is also required. The schematic illustrations, pictures and descriptions serve only for the purposes of explanation and representation of the instructions and cannot be used as a basis for installation or assembly work. All rights reserved.
