

Peugeot 206 - Motorkontrollampen lyser | HELLA

Peugeot206 1,6 HDIÅrgang 2005-2007Motorkode DV6TED4 (9HZ)Motorkontrollampen lyserHvis den ovennævnte fejl påpeges af kunden, kan årsagen være dårlig kontakt i stikket på luftmassemåleren. Desuden kan der klages over, at motoren skifter til nødfunktion og har nedsat effekt. Ydermere kan der være lagret diverse fejlkoder med relation til luftmassemåleren. I så fald skal der monteres et ledningsbundt med stik fra et reparationssæt med OE-resnr. 6569Q9.Bemærk!Ledningsbundtet i reparationssættet har andre ledningsfarver end det, der er monteret fra fabrikken. Ved montering skal man derfor være omhyggelig med tilslutningen.

Model year from 2005–2007

Engine code DV6TED4 (9HZ)

Caution!

Engine malfunction indicator light is on

The wiring harness in the repair kit has different coloured cables than the cable set installed at the factory. Make sure that you connect the cables correctly during assembly.
