

Vejledning i reservedelssøgning | HELLA

Hvilket bremsesystem er bilen udstyret med? Som følge af bilfabrikanternes mange varianter af modeller og komponenter er det ikke altid muligt at se, hvilke bremsekomponenter, der skal benyttes. Ved søgning efter reservedele kan det - foruden informationerne om bilen - være nødvendigt at kende det bremsesystem, som bilen er udstyret med. Henvisning til systemtype Hvis disse informationer ikke angives af bilfabrikanten, har teknikeren kun den mulighed at skaffe disse informationer direkte fra bilen. Fabrikanten af bremsesystemet kan aflæses på de bremsekalibre, der er monteret fra fabrikken.

Due to the range of models and spare parts produced by automobile manufacturers, it is not always possible to determine the precise components used in the braking system.

In addition to the vehicle information, you may also require information on the braking system installed in the vehicle when researching spare parts.

Note on finding the right components

If this information is not provided by the vehicle manufacturer, the technician's only option is to obtain it directly from an examination of the vehicle.

The name of the braking system manufacturer can be found on the factory-installed brake caliper.

Important safety note

Technical information and practical tips have been compiled by HELLA in order to provide professional support to vehicle workshops in their day-to-day work.
