

Esfuerzo de corte | HELLA

Comprobación del esfuerzo de corte

En muchas publicaciones relacionadas con el Reglamento CEE 90 se menciona el concepto "esfuerzo de corte".

Lo que se revisa al realizar una comprobación del esfuerzo de corte es la fuerza de unión entre el material de fricción y la placa base de la pastilla. En dicha comprobación se aplica tanta fuerza que la masa de fricción de la pastilla se desprende de la placa base.
