Nissan Qashqai - Poor braking function

Nissan Qashqai

Model: J10 and NJ10

Model years: 08/2010 - 02/2011

Poor braking function

If signs of the above fault are noticed, this may also be associated with defective brake hoses.

Repair notes

In the event of customer complaints, special attention should therefore be paid to these components during fault diagnosis. Material fatigue may in this case result in expansion or leakage of the brake hose, and in the worst-case scenario in failure of the braking system.

Procedure:

- Check brake hoses und lines for routing, condition and leak tightness.
- Remove and replace faulty parts.

In this context please observe the repair and maintenance notes provided by the vehicle manufacturer.
