

Vauxhall Astra GTC - Radiator fan module defective | HELLA

Vauxhall

Astra GTC

Model year: 2010–2012

Engine: A14 XEL/NET + X16 LET

Radiator fan short circuit

Radiator fan module defective

In the vehicles mentioned above, the radiator fan may short-circuit, damaging the fan module. This is prevented by making modifications to the wiring harness.

Vehicles with the following chassis numbers are affected:

C G 000013 - C G 000019 (Gliwice plant)

Depending on which engine cooling module the vehicle has, an adapter wiring harness is installed in the engine compartment and connected to the fuse box. As the vehicle manufacturer has launched a product safety campaign to highlight this issue, further information can be obtained from your local authorized dealer.
