

Volvo V50/S40 - replacing cabin air filter

Data sheet

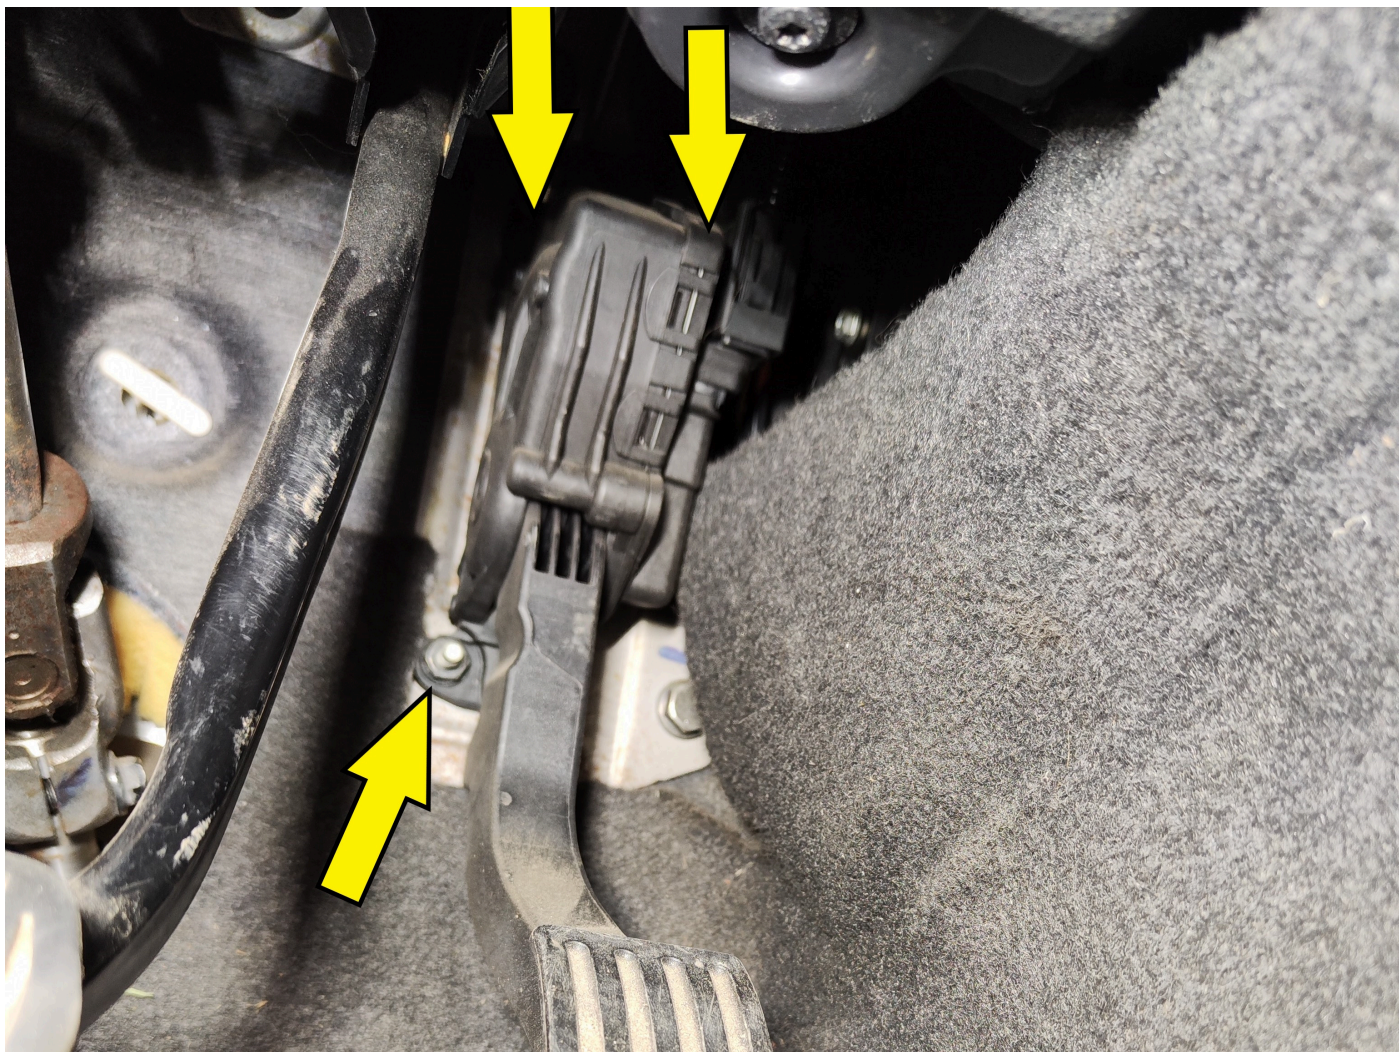

Manufacturer	Volvo
Vehicle model	V50/S40
Engine	All models
Year of manufacture	2004-2012
Symptoms	Replacing the cabin air filter

Important safety note

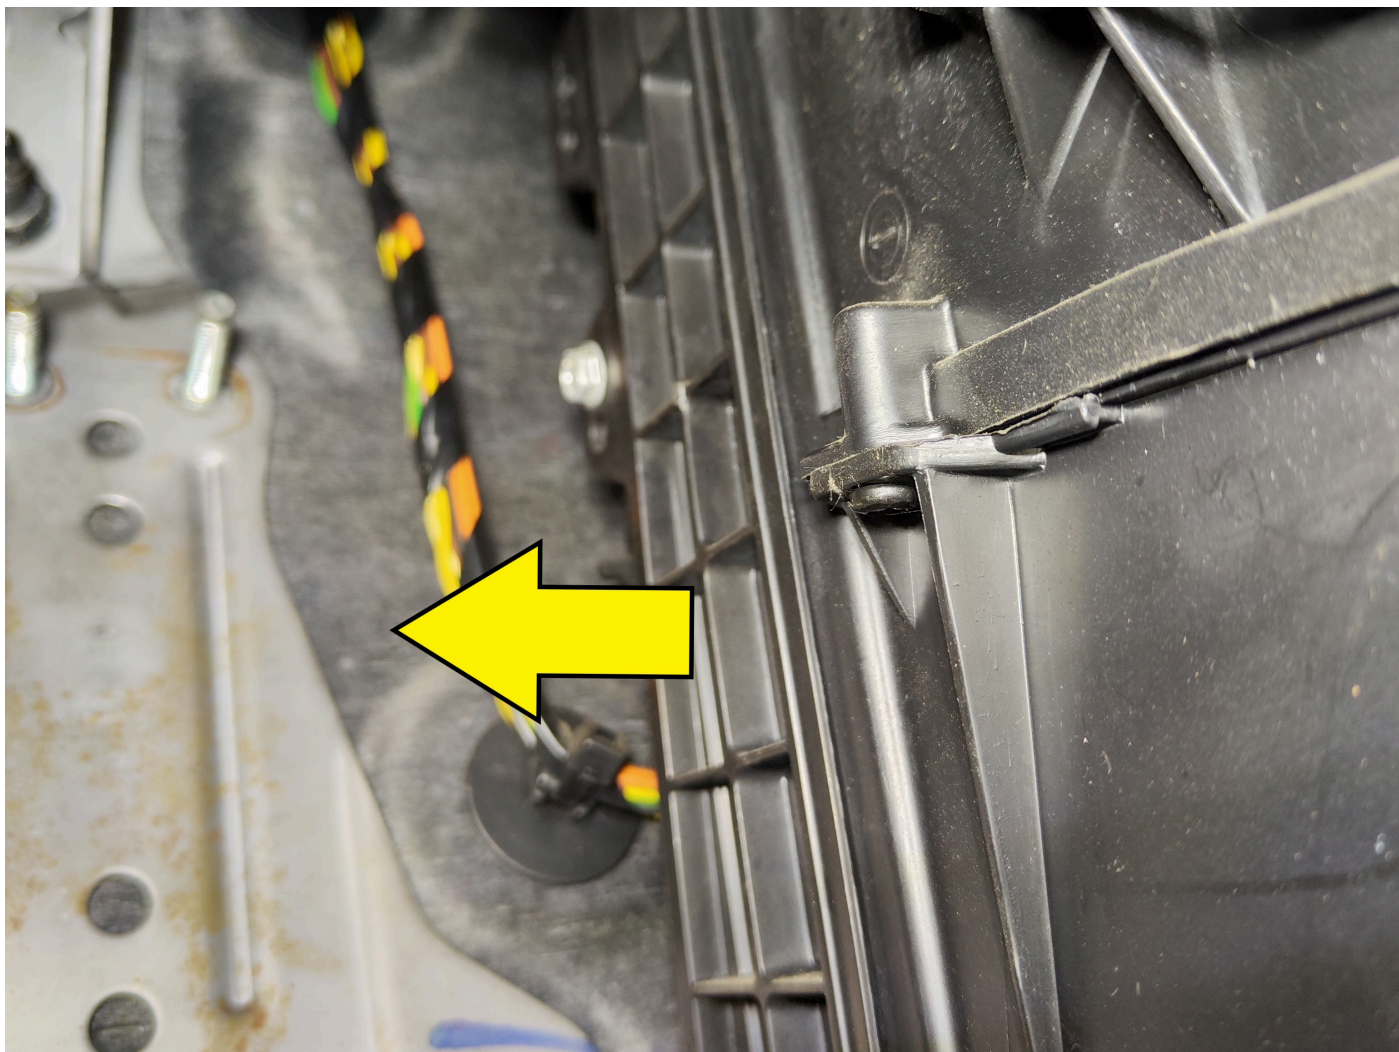

Cabin air filter / pollen filter

In the above-mentioned vehicle, the cabin air filter is located in the driver's footwell on the right-hand side. In order to replace the filter, you should proceed as follows:

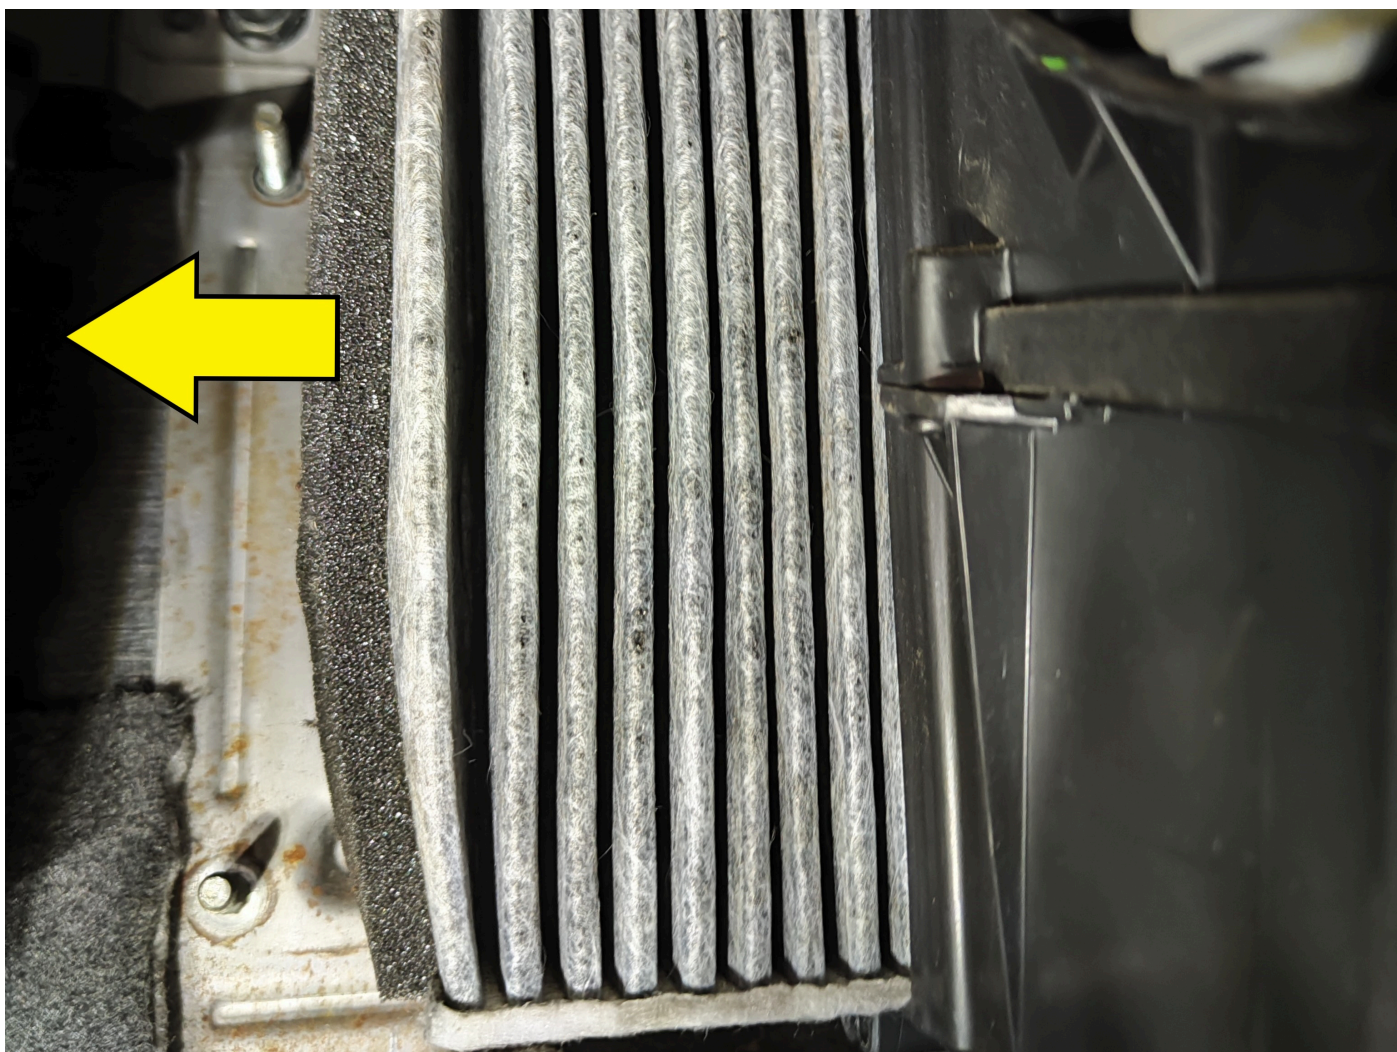

- Switch off the ignition
- Push back the driver's seat
- Remove 3 fastening screws from the accelerator pedal
- Disconnect the connector from the accelerator pedal and remove the pedal
- Fold down the carpet to the right of the pedal
- Remove the screws from the cover of the ventilation box
- Remove cover
- Pull out the cabin filter
- Insert the new filter and bend it slightly to make installation easier
