

HEADLAMP CLEANING SYSTEM

HELLA has been at the forefront of headlamp cleaning and windshield washer systems for more than 50 years. Today every second headlamp cleaning system is from HELLA.

According to the individual customer requirements HELLA is offering a wide range of products to complete your headlamp and windshield cleaning systems:

- Washer pumps
- Nozzle systems (also in the headlamp)
- Hose assemblies

The integration of HELLAs cleaning components make a positive contribution to greater safety and increased driver comfort. Individual connection concepts and compact designs guarantee ease mounting into the cleaning system for cars and trucks. HELLA offers everything ranging from individual components to minutely matched complete systems and has worldwide development and manufacturing facilities.

ADVANTAGES

- HELLA is market leader for headlamp cleaning systems
- Flexible installation due to compact design
- High cleaning performance with minimal water consumption
